Resources and capabilities; 7 Libertarianism and Marxism; 8 Children and their mothers; 9 Income and wealth; 10 Household income; 11 What should we measure?; 12 Lorenz curves and inequality measures; 13 Social evaluation of inequality; 14 Some inequality measures; 15 Poverty; 16 Decomposition of inequality measures; Appendix A: uncertainty and expected utility Appendix B: sampling errorsNotes; Suggested further reading; References; Index |
| Sommario/riassunto | Introducing the main theories of distributional justice the book covers utilitarianism and welfare economics, moving on to Rawls's social contract and the Sen/Nussbaum capability approach with a refreshingly readable style. There is a chapter covering the position of mothers and children in theories of justice. The book then studies empirical methods used in analysing the distribution of economic goods, covering Lorenz curves and inequality measures. The concepts of income, wealth and economic goods are comprehensively discussed, |

with a particular view to their role in theories of justice. Thi
