

1. Record Nr.	UNIPARTHENOPE000029725
Autore	Enselmi, Clemente Maria
Titolo	Profili giuridici ed economici del merchandising nell'2019attività sportiva [risorsa elettronica] / tesi di dottorato di: Clemente Maria Enselmi
Pubbl/distr/stampa	Napoli, 2011
Titolo uniforme	Profili giuridici ed economici del merchandising nell'2019attività sportiva
Descrizione fisica	1 disco ottico (CD-ROM) ; 12 cm
Disciplina	343.45082 796.0698
Collocazione	TESI Dottorato CD-ROM/79
Lingua di pubblicazione	Italiano
Formato	Risorsa elettronica
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910821999803321
Autore	Fowler Michael
Titolo	Architectures of sound : acoustic concepts and parameters for architectural design // Michael Fowler
Pubbl/distr/stampa	Basel, Switzerland : , : Birkhauser, , [2017] ©2017
ISBN	9783035613292 303561329X 9783035613254 3035613257
Descrizione fisica	1 online resource (208 pages) : illustrations
Disciplina	729.29
Soggetti	Architectural acoustics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Frontmatter -- Contents -- Introduction -- Prelude -- Chapter 1: An Architecture of the Ear -- Chapter 2: On Auditory Scale -- Chapter 3: Dumb Holes and the Acoustic Horizon -- Chapter 4: The Taxonomy of a Meta-theory -- Chapter 5: Re-hearing Icons of Architecture I. -- Chapter 6: Re-hearing Icons of Architecture II. -- Chapter 7: Acoustic Futures -- Chapter 8: "Like Quail Clucking . . ." -- Postlude -- Bibliography -- Picture Credits
Sommario/riassunto	<p>Architects are used to designing visually. In order to expand their basic design tools, this book explores the interactions between sound, space, hearing, and architecture. To this end, the author uses contemporary and historic buildings and projects, but also fictional, philosophical, and theoretical approaches – the idea is not only to define sound as a source, but also as an instrument of architectural space. By introducing a metatheory of "critical hearing", designers are able to acoustically test their projects and contribute to their design with auditive input, already at the design stage.</p> <p>Architekten sind es gewohnt, visuell zu entwerfen. Um ihre Entwurfsgrundlagen zu erweitern, stellt dieses Buch die Zusammenhänge zwischen Klang, Raum, Hören und Architektur dar.</p>

Dafür nutzt der Autor zeitgenössische wie historische Bauten und Projekte, aber auch fiktionale, philosophische und theoretische Ansätze: schliesslich soll der Klang nicht nur als Quelle, sondern auch als Instrument des architektonischen Raums definiert werden. Durch die Einführung in eine Metatheorie des „kritischen Hörens“ können die Entwerfenden ihre Projekte bereits in der Entwurfsphase akustisch prüfen und auditiv gestalten.
