Descrizione fisica	1 online resource (29 p.)
Collana	IMF working paper ; ; WP/06/53
Soggetti	Inflation (Finance) - Sierra Leone - Econometric models Pricing - Sierra Leone - Econometric models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"February 2006."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Contents""; ""I. Introduction""; ""II. Empirical Studies on Pricing Behavior""; ""III. Some Stylized Factsa€?Cross-Sectional Evidence""; ""IV. What Explains the High Frequency of Price Changes?""; ""V. What Determines the Frequency of Price Changes Over Time?""; ""VI. Conclusions""; ""References""; ""APPENDIX""
Sommario/riassunto	We use cross-section and time-series techniques to analyze pricing behavior in Sierra Leone. In cross-sectional data, we find that inflation volatility and product diversification are the main factors explaining differences in the frequency of price adjustments. We show that variance in the fraction of prices subject to change is a key determinant of inflation volatility in Sierra Leone, indicating that retail prices are sensitive to economic events. We explain variations in this fraction over time with past inflation and monetary growth, which are important policy variables.
