

1. Record Nr.	UNINA9910822078103321
Autore	Matubayasi Norihiro
Titolo	Surface tension and related thermodynamic quantities of aqueous electrolyte solutions // Norihiro Matubayasi
Pubbl/distr/stampa	Boca Raton, Fla., : CRC Press, 2014
ISBN	0-429-18497-2 1-4398-8087-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (220 p.)
Collana	Surfactant science ; ; 157
Disciplina	530.4/275
Soggetti	Surface tension Surface chemistry Thermodynamics Electrolyte solutions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Contents; Preface; Chapter 1: Introduction to Thermodynamic Consideration of Fluid/Fluid Interface; Chapter 2: Basic Thermodynamic Relations for the Analysis of Fluid/Fluid Interface; Chapter 3: Surface Tension of Pure Water at Air/Water and Oil/Water Interfaces; Chapter 4: Surface Tension of Solutions; Chapter 5: Surface Tension of Simple Salt Solutions; Chapter 6: Adsorption of Ions at Air/Water Interface; Chapter 7: Surface Tension of Solutions and Temperature; Chapter 8: Adsorption from Mixed Electrolyte Solutions; Chapter 9: Aqueous Solutions of Zwitterionic Amino Acids AppendixBack Cover
Sommario/riassunto	Surface tension provides a thermodynamic avenue for analyzing systems in equilibrium and formulating phenomenological explanations for the behavior of constituent molecules in the surface region. While there are extensive experimental observations and established ideas regarding desorption of ions from the surfaces of aqueous salt solutions, a more successful discussion of the theory has recently emerged, which allows the quantitative calculation of the distribution of ions in the surface region. Surface Tension and Related Thermodynamic Quantities of Aqueous Electrolyte Solutions provides a d
