Titolo	Implementing quality measures for accountability in community-based care for people with serious illness : proceedings of a workshop // Laurene Graig, Sylara Marie Cruz, and Joe Alper, rapporteurs ; Roundtable on Quality Care for People with Serious Illness, Board on Health Care Services, Board on Health Sciences Policy, Health and Medicine Division, the National Academies of Sciences, Engineering, Medicine
Pubbl/distr/stampa	Washington, DC : , : The National Academies Press, , [2018] ©2018
ISBN	0-309-48210-0 0-309-48208-9
Descrizione fisica	1 online resource (xx, 88 pages) : illustrations
Disciplina	362.120973
Soggetti	Community health services - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	The patient-family perspective -- Gaps, challenges, and opportunities in implementing quality measures for accountability -- Innovative approaches to implementing quality measures from the perspectives of health care providers and payers -- Measure review and endorsement redesign at the National Quality Forum -- Innovative approaches and policy levers for implementing quality measurements from the perspectives of public programs -- Future use of quality measures for accreditation to support accountability for high-quality care -- Supporting clinical communities for quality and accountability -- Charting a path forward.
Sommario/riassunto	"Millions of Americans of all ages face the challenge of living with serious illnesses such as advanced cancer, heart, or lung disease. Many people with serious illness are increasingly cared for in community settings. While the number of community-based programs to provide care for those with serious illness has grown significantly, the quality of care provided is not consistent across geographic locations or care settings. Care for the serious illness population often features gaps in

coordination across sites of care and poor patient and family perceptions as to the quality of care provided. In an effort to better understand and facilitate discussions about the challenges and opportunities related to identifying and implementing quality measures for accountability purposes in community-based serious illness care, the National Academies of Sciences, Engineering, and Medicine held a public workshop on April 17, 2018, in Washington, DC. Workshop participants explored the current state of quality measurement for people with serious illness, their families, and caregivers, with the aim of identifying next steps toward effectively implementing measures to drive improvement in the quality of community-based care for those facing serious illness. This publication summarizes the presentations and discussions from the workshop"--Publisher's description.
