1. Record Nr.   UNINA9910822107103321

   Autore   Crawford Jacqui

   Titolo   Practical aspects of ECG recording / / Jacqui Crawford, Linda Doherty

   Pubbl/distr/stampa   Cumbria [England], : M&K Update, 2012

   ISBN   1-282-10876-X
                        9786613802118
                        1-907830-30-8

   Edizione   [1st ed.]

   Descrizione fisica   1 online resource (165 p.)

   Altri autori (Persone)   DohertyLinda

   Disciplina   616.2

   Soggetti   Electrocardiography

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references and index.

   Nota di contenuto   Prelims; Contents; Preface; About the Authors; Chapter 1 An
                        introduction to electrocardiography; Chapter 2 Electrocardiographic
                        anatomy; Chapter 3 Positioning the patient and locatingelectrode
                        positions; Chapter 4 Skin preparation; Chapter 5 ECG Electrodes;
                        Chapter 6 Understanding the lead system and colour codesused for
                        ECG recording; Chapter 7 Understanding ECG equipment,
                        specificationstandards and setting choices for recording ECGs; Chapter
                        8 Recording and checking the ECG; Chapter 9 Recognising and
                        reducing artifactin the ECG recording; Chapter 10 The computer
                        generated report
                        Chapter 11 Archiving recordsChapter 12 Introduction to quality control
                        in ECG recording; Chapter 13 Infection control in ECG recording;
                        Chapter 14 Training and continuing professional development; Answers
                        to key review questions; Index

   Sommario/riassunto   Practical Aspects of ECG Recording is for everyone who records or
                        teaches ECGs. Most electrocardiography courses and textbooks skim
                        over recording and place their main emphasis on interpretation. The
                        purpose of this book is to shift the focus firmly back onto good
                        recording technique as the fundamental starting point for developing
                        ECG competency. Although the chapters are self-contained,
                        pedagogical aids provide an opportunity to deepen learning through
                        the integration of accumulated skills and knowledge. Each chapter
