Nota di bibliografia	Includes bibliographical references (p. 89-95) and index.
Nota di contenuto	The library's green role -- The library as a green place -- Green services at your library -- The library as green teacher.
Sommario/riassunto	Going Green is now a national issue, and patrons expect their library to respond in the same way many corporations have. Libraries are going green with logos on their websites, programs for the public, and a host of other initiatives. This is the first book to focus strictly on the library's role in going green, helping you with collection development, disposal, and recycling issues; green equipment, technology, and facilities; programming ideas with supporting tables and figures; and ways to get the community involved in the process.--From publisher description.
