Sommario/riassunto	Like your own personal survival guide, Help! I'm Teaching Middle School Science is a nontechnical how-to manual-especially for first-year teachers. But even veteran teachers can benefit from the plentiful ideas, examples, and tips on teaching science the way middle-schoolers learn best. The book covers all the basics:.; what to do on the first day of school (including icebreaker activities),.; preparing safe and effective lab lessons,.; managing the classroom,.; working with in-school teams as well as parents. But its practical-and encouraging-approach doesn't mean it shortchanges the basics
