Sommario/riassunto

The long-term impact of globalization, outsourcing, and technological
change on workers is increasingly being studied by economists. At the
nexus of labor economics, industry studies, and industrial
organization, *The Analysis of Firms and Employees* presents new
findings about these impacts by examining the interaction between the
internal workings of businesses and outside influences from the market
using data from countries around the globe. The result is enhanced
insight into the dynamic interrelationship between firms and workers.
