

1. Record Nr.	UNINA9910822478603321
Autore	Hardjono Thomas
Titolo	Security in wireless LANs and MANs / / Thomas Hardjono, Lakshminath R. Dondeti
Pubbl/distr/stampa	Boston, : Artech House, 2005
ISBN	1-58053-756-1
Edizione	[1st ed.]
Descrizione fisica	xviii, 243 p. : ill
Collana	Artech House computer security series
Altri autori (Persone)	DondetiLakshminath R
Disciplina	005.8
Soggetti	Metropolitan area networks (Computer networks) - Security measures Wireless communication systems - Security measures Wireless LANs - Security measures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Security in Wireless LANs and MANs -- Contents vii -- Preface xv -- Acknowledgments xvii -- Chapter 1 Introduction 1 -- Part I Authentication and Authorization in WLANs -- Chapter 2 Authentication in WLANs: An Overview 9 -- 2.1 INTRODUCTION 9 -- 2.2 BASIC ENTITIES AND REQUIREMENTS IN WLANS 10 -- 2.3 AUTHENTICATION MODELS FOR WLANS 14 -- 2.4 THE UNIVERSAL ACCESS METHOD 16 -- 2.5 THE 802.1X AUTHENTICATION FRAMEWORK 18 -- 2.6 THE RADIUS PROTOCOL 23 -- 2.7 DEVICE AUTHENTICATION FOR NETWORK ELEMENTS 27 -- 2.8 SUMMARY 35 -- References 35 -- Chapter 3 EAP, TLS, and Certificates 37 -- 3.1 INTRODUCTION 37 -- 3.2 THE EXTENSIBLE AUTHENTICATION PROTOCOL 38 -- 3.3 OVERVIEW OF TLS 43 -- 3.4 AN OVERVIEW OF CERTIFICATES AND PKI 49 -- 3.5 SUMMARY 54 -- References 55 -- Chapter 4 EAP Methods 57 -- 4.1 INTRODUCTION 57 -- 4.2 THE EAP-TLS METHOD 57 -- 4.3 PEAP: EAP-OVER-TLS-OVER-EAP 62 -- 4.4 TUNNELED TLS (EAP-TTLS) 70 -- 4.5 EAP-SIM 76 -- 4.6 EAP-AKA 82 -- 4.7 EAP-FAST 84 -- 4.8 RADIUS SUPPORT FOR EAP 86 -- 4.9 SUMMARY 87 -- References 88 -- Part II Data Protection inWireless LANs -- Chapter 5 WEP 93 -- 5.1 INTRODUCTION 93 -- 5.2 THREAT MODEL 94 -- 5.3 ENTITY AUTHENTICATION 95 -- 5.4 WEP ENCAPSULATION AND DECAPSULATION 98 -- 5.5 DESIGN FLAWS IN WEP 103 -- 5.6 SUMMARY 106 -- References 106 -- Chapter 6 802.11i Security: RSNA 109 -- 6.1

ENCAPSULATION OF MULTICAST AND BROADCAST MPDUS 227 -- 12.8
SUMMARY 229 -- References 229 -- Chapter 13 Conclusion and
Outlook 231 -- About the Authors 235 -- Index 237.

Sommario/riassunto

With the popularity of the Wireless Local Area Network (WLAN) standard 802.11 WiFi® and the growing interest in the next generation Wireless Metropolitan Area Network (WMAN) standard 802.16 WiMax®, the need for effective solutions to the inherent security weaknesses of these networking technologies has become of critical importance. Thoroughly explaining the risks associated with deploying WLAN and WMAN networks, this groundbreaking book offers you practical insight into identifying and overcoming these security issues.
