

1. Record Nr.	UNINA9910785460503321
Autore	Hay Jonathan <1956->
Titolo	Sensuous surfaces : the decorative object in early modern China // Jonathan Hay
Pubbl/distr/stampa	Honolulu : , : University of Hawaii Press, , 2010 ©2010
ISBN	1-282-93479-1 9786612934797 1-86189-846-0
Descrizione fisica	1 online resource (440 pages) : color illustrations
Disciplina	745.0951
Soggetti	Decorative arts - China - History - Ming-Qing dynasties, 1368-1912 Art objects, Chinese
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 417-422) and index.
Nota di contenuto	Sensuous Surfaces Cover; Imprint page; Contents; Introduction; Part 1: The Decorative Object; 1. Decoration as Luxury; 2. The Object Thinks With Us; 3. Surface, Affect, Metaphor; Part II: The Surfacescape's Resources; 4. Monochrome Smoothness; 5. Material Patterning; 6. Formal Pattern; 7. Depiction; 8. Inscription; 9. Fictive Surface; 10. Diversified Surface; Part III: From Surfacescapes to Objectscapes; 11. Layering; 12. Object Landscapes; 13. The Atmospherics of Surface; 14. The Erotic Economy of Decoration; References; Select Bibliography; Character List for Chinese; Acknowledgements; Photo Acknowledgements; Index
Sommario/riassunto	?Sensuous Surfaces is a systematic introduction to the decorative arts in Ming and Qing dynasty China. Jonathan Hay's analysis takes in both material and technique, and also issues of patronage and taste, which together formed a loose system of informal rules that affected every level of decoration in early modern China, from an individual object to the arrangement of an entire residential interior. By engaging the actual and metaphoric potential of surface, this system guided the production and use of the decorative arts during a period of explosive growth, which started in the late sixt

2. Record Nr.	UNINA9910822581503321
Autore	Powell Warren B. <1955->
Titolo	Approximate dynamic programming : solving the curses of dimensionality // Warren B. Powell
Pubbl/distr/stampa	Hoboken, N.J., : J. Wiley & Sons, c2011
ISBN	9786613273703 9781283273701 1283273705 9781118029169 111802916X 9781118029176 1118029178 9781118029152 1118029151
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (658 p.)
Collana	Wiley series in probability and statistics
Disciplina	519.7/03
Soggetti	Dynamic programming Programming (Mathematics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Approximate Dynamic Programming; Contents; Preface to the Second Edition; Preface to the First Edition; Acknowledgments; 1 The Challenges of Dynamic Programming; 1.1 A Dynamic Programming Example: A Shortest Path Problem; 1.2 The Three Curses of Dimensionality; 1.3 Some Real Applications; 1.4 Problem Classes; 1.5 The Many Dialects of Dynamic Programming; 1.6 What Is New in This Book?; 1.7 Pedagogy; 1.8 Bibliographic Notes; 2 Some Illustrative Models; 2.1 Deterministic Problems; 2.2 Stochastic Problems; 2.3 Information Acquisition Problems; 2.4 A Simple Modeling Framework for Dynamic Programs 2.5 Bibliographic Notes Problems; 3 Introduction to Markov Decision Processes; 3.1 The Optimality Equations; 3.2 Finite Horizon Problems; 3.3 Infinite Horizon Problems; 3.4 Value Iteration; 3.5 Policy Iteration; 3.6 Hybrid Value-Policy Iteration; 3.7 Average Reward Dynamic

Programming; 3.8 The Linear Programming Method for Dynamic Programs; 3.9 Monotone Policies*; 3.10 Why Does It Work?**; 3.11 Bibliographic Notes; Problems; 4 Introduction to Approximate Dynamic Programming; 4.1 The Three Curses of Dimensionality (Revisited); 4.2 The Basic Idea; 4.3 Q-Learning and SARSA
4.4 Real-Time Dynamic Programming; 4.5 Approximate Value Iteration; 4.6 The Post-Decision State Variable; 4.7 Low-Dimensional Representations of Value Functions; 4.8 So Just What Is Approximate Dynamic Programming?; 4.9 Experimental Issues; 4.10 But Does It Work?; 4.11 Bibliographic Notes; Problems; 5 Modeling Dynamic Programs; 5.1 Notational Style; 5.2 Modeling Time; 5.3 Modeling Resources; 5.4 The States of Our System; 5.5 Modeling Decisions; 5.6 The Exogenous Information Process; 5.7 The Transition Function; 5.8 The Objective Function; 5.9 A Measure-Theoretic View of Information**
5.10 Bibliographic Notes; Problems; 6 Policies; 6.1 Myopic Policies; 6.2 Lookahead Policies; 6.3 Policy Function Approximations; 6.4 Value Function Approximations; 6.5 Hybrid Strategies; 6.6 Randomized Policies; 6.7 How to Choose a Policy?; 6.8 Bibliographic Notes; Problems; 7 Policy Search; 7.1 Background; 7.2 Gradient Search; 7.3 Direct Policy Search for Finite Alternatives; 7.4 The Knowledge Gradient Algorithm for Discrete Alternatives; 7.5 Simulation Optimization; 7.6 Why Does It Work?**; 7.7 Bibliographic Notes; Problems; 8 Approximating Value Functions; 8.1 Lookup Tables and Aggregation
8.2 Parametric Models; 8.3 Regression Variations; 8.4 Nonparametric Models; 8.5 Approximations and the Curse of Dimensionality; 8.6 Why Does It Work?**; 8.7 Bibliographic Notes; Problems; 9 Learning Value Function Approximations; 9.1 Sampling the Value of a Policy; 9.2 Stochastic Approximation Methods; 9.3 Recursive Least Squares for Linear Models; 9.4 Temporal Difference Learning with a Linear Model; 9.5 Bellman's Equation Using a Linear Model; 9.6 Analysis of TD(0), LSTD, and LSPE Using a Single State; 9.7 Gradient-Based Methods for Approximate Value Iteration*
9.8 Least Squares Temporal Differencing with Kernel Regression*

Sommario/riassunto

Praise for the First Edition "Finally, a book devoted to dynamic programming and written using the language of operations research (OR)! This beautiful book fills a gap in the libraries of OR specialists and practitioners."-Computing Reviews This new edition showcases a focus on modeling and computation for complex classes of approximate dynamic programming problems Understanding approximate dynamic programming (ADP) is vital in order to develop practical and high-quality solutions to complex industrial problems, particularly when those problems i
