| Titolo | Climate variability and ecosystem response at long-term ecological research sites // edited by David Greenland, Douglas G. Goodin, Raymond C. Smith |
| Pubbl/distr/stampa | Oxford, [England] ; ; New York, New York : , : Oxford University Press, , 2003 ©2003 |
| ISBN | 0-19-756188-8 1-280-48218-4 9786610482184 1-4237-6318-1 0-19-803430-X 1-4337-0099-9 |
| Descrizione fisica | 1 online resource (478 p.) |
| Collana | Long-Term Ecological Research Network Series |
| Disciplina | 577.2/2 |
| Soggetti | Bioclimatology Ecology - Research Climatic changes |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Previously issued in print: 2003. |
| Nota di bibliografia | Includes bibliographical references at the end of each chapters and index. |
| Nota di contenuto | Contents; Contributors; Abbreviations; 1 An Introduction to Climate Variability and Ecosystem Response; I: Short-Term Climate Events; II: The Quasi-Quintennial Timescale; III: The Interdecadal Timescale; IV: Century to Millennial Timescale; V: Climate Variability and Ecosystem Response at Selected LTER Sites at Multiple Timescales; Index |
| Sommario/riassunto | This volume in the Long-Term Ecological Research Network Series looks at the work carried out on climate change at all the LTER sites. It also looks at how our understanding of this work has developed. Global climate change is a central issue facing the world, an issue that brings large numbers of scientists together across a wide range of fields. These sites hold some of the best available data measuring long term impacts and changes in the environment. Until now the research done |

at these sites has not been previously made available to the broader climate change research community. This book pulls together information from all 20 research sites.
