

1. Record Nr.	UNINA9910822715203321
Titolo	The inheritance and innateness of grammars // edited by Myrna Gopnik
Pubbl/distr/stampa	New York ; , : Oxford University Press, , 2023
ISBN	0-19-772174-5 1-280-46999-4 0-19-535400-1 1-60256-211-3
Descrizione fisica	1 online resource (241 p.)
Collana	Vancouver studies in cognitive science ; ; v.6. Oxford scholarship online
Disciplina	401
Soggetti	Innateness hypothesis (Linguistics) Biolinguistics Language disorders Language acquisition Language and languages - Origin
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 1997.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents; Contributors; 1. Introduction; 2. Evolution, Nativism and Learning in the Development of Language and Speech; 3. In the Beginning: On the Genetic and Environmental Factors that Make Early Language Acquisition Possible; 4. Exploring Innateness through Cultural and Linguistic Variation; 5. Epidemiology of Specific Language Impairment; 6. The Biological Basis of Language: Familial Language Impairment; 7. The Grammatical Agreement Deficit in Specific Language Impairment: Evidence from Therapy Experiments; 8. Specific Language Impairment, Cognition and the Biological Basis of Language 9. Evolutionary Biology and the Evolution of Language10. A Neurobiological Approach to the Noninvariance Problem in Stop Consonant Categorization
Sommario/riassunto	Based on an annual conference at Simon Fraser University, this volume collects together papers that discuss the evidence and arguments

regarding the inheritability and innateness of grammar, and shows that whole precursors of language exist in other creatures. In the VANCOUVER STUDIES IN COGNITIVE SCIENCE series.
