

1. Record Nr.	UNINA9910822837903321
Titolo	Biotechnological production of natural ingredients for food industry // edited by Juliano Lemos Bicas, Mario Roberto Marostica Jr., Glauca Maria Pastore
Pubbl/distr/stampa	Sharjah, United Arab Emirates : , : Bentham Science Publishers, , 2016 ©2016
ISBN	1-68108-265-9
Edizione	[First edition.]
Descrizione fisica	1 online resource (512 p.)
Disciplina	660.60289
Soggetti	Biotechnology - Safety measures Biotechnology - Health aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	CONTENTS; FOREWORD ; PREFACE ; List of Contributors ; Introductory Overview of Biotechnological Additives ; INTRODUCTION; HISTORICAL ASPECTS OF BIOTECHNOLOGY FOR MODERN DEVELOPMENTS; Enzymes; Genetic Engineering; MAIN BIOTECHNOLOGICAL INGREDIENTS: FROM RESEARCH TO INDUSTRY; CONCLUDING REMARKS; CONFLICT OF INTEREST; ACKNOWLEDGMENTS; REFERENCES; Alternative Sweeteners: Current Scenario and Future Innovations for Value Addition ; INTRODUCTION; NATURAL SWEETENERS; GLOBAL SWEETENERS MARKET; USES OF SWEETENERS IN FOOD INDUSTRY; NATURAL SWEETENERS OF PLANT ORIGIN; Non-Saccharide Natural Sweeteners ECONOMICAL IMPORTANCE AND COMMERCIAL RELEVANCE OF BIOTECHNOLOGICALLY PRODUCED SWEETENERS NATURAL SACCHARIDE-DERIVED SWEETENERS; Polyols; Mannitol; Sorbitol; Xylitol; Erythritol; Isomalt; Maltitol; Industrial Relevance; RESEARCH ADVANCES IN PLANT DERIVED NON-SACCHARIDE SWEETENERS; IMPENDING AREAS OF RESEARCH; THE FUTURE OF INNOVATION IN ALTERNATIVE SWEETENERS ; CONFLICT OF INTEREST; ACKNOWLEDGEMENTS; REFERENCES; Biotechnological Production of Amino Acids and Nucleotides ; INTRODUCTION; GLUTAMIC ACID, ITS SALTS AND 5'-NUCLEOTIDES AS FLAVOR ENHANCERS ; FOOD AND FEED USES OF

## AMINO ACIDS

Feed use of amino acids  
Food Use of Amino Acids; ECONOMIC IMPORTANCE AND COMMERCIAL RELEVANCE OF MICROBIAL AMINO ACIDS AND NUCLEOTIDES; MICROBIAL PRODUCTION OF L-GLUTAMATE AND OTHER L-GLUTAMATE FAMILY AMINO ACIDS; Glutamate Production; Eliciting Glutamate Production by *C. glutamicum*; De-Bottlenecking Glutamate Biosynthesis; Precursor Supply for Glutamate Production; Cofactor Supply for Glutamate Production; Glutamate Export; Avoidance of Glutamate Re-import and Degradation; L-Glutamine Production; De-bottlenecking Glutamine Biosynthesis; Avoidance of Glutamine Degradation  
Precursor Supply for Glutamine Production and Avoiding by-Products  
Export and Avoidance of Re-import; L-Arginine Production; De-bottlenecking L-Arginine Biosynthesis; Avoidance of By-products of L-Arginine Production; Precursor Supply for L-Arginine Production; Cofactor Supply for L-Arginine Production; L-Arginine Export; Avoidance of L-Arginine Re-import and Degradation; Industrial Production Strains and Processes, and Improvement of the Fermentation Quality of Strains; L-Proline Production; L-Proline Producing Strains; MICROBIAL PRODUCTION OF L-LYSINE AND OTHER ASPARTATE FAMILY AMINO ACIDS  
L-Lysine Production  
L-lysine Biosynthesis; Strain Development for Microbial Production of L-lysine; De-bottlenecking and L-lysine Export ; Reduction of By-products and Competing Pathways of L-lysine Production; Precursor Supply for L-lysine Production and Redirection of Carbon Metabolism; NADPH Supply for L-lysine Production; Strains and Industrial Processes of L-lysine Production; L-Threonine Production; L-Threonine Biosynthesis; Strain Construction Strategies for L-threonine Production; Transport Engineering for L-threonine Production; Alternative Substrates for L-threonine Production  
Enzyme Proximity for L-threonine Production
