Sommario/riassunto

<P>The Convention on Biological Diversity (CBD) strives for the sustainable and equitable utilization of genetic resources, with the ultimate goal of conserving biodiversity. The CBD and the Nagoya Protocol which has since been elaborated suggest a bilateral model for access to genetic resources and the sharing of benefits from their utilization. There is concern that the bilateral exchange ""genetic resource for benefit sharing"" could have disappointing results because providers are left out of the process of research and development, benefits are difficult to be traced to sources, and provi
