Sommario/riassunto

This multidisciplinary volume presents a refreshing new approach to environmental values in the global age. It investigates the challenges that globalization poses to traditional environmental values in general as well as in politics and international governance. Divided into five parts, the book investigates how environmental values could be reconceived in a globalizing world. Part I explores contemporary environmental values and their implications for a globalizing world. Part II examines the development of Western and Eastern environmental values. Part III discusses contem
