

1. Record Nr.	UNINA9910822925903321
Titolo	Support for forensic science research : improving the scientific role of the National Institute of Justice / / Committee on Strengthening Forensic Science at the National Institute of Justice
Pubbl/distr/stampa	Washington, District of Columbia : , : The National Academies Press, , 2015 ©2015
ISBN	0-309-37648-3 0-309-37646-7
Descrizione fisica	1 online resource (116 p.)
Disciplina	364.973
Soggetti	Forensic sciences - United States - Evaluation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	FrontMatter; Preface; Acknowledgments; Contents; Figures, Tables, and Boxes; Acronyms; Summary; 1 Introduction; 2 Forensic Science in the United States; 3 Research Operations of the National Institute of Justice; 4 Forensic Science Research at NIJ: A Blueprint for the Future; References; Appendixes; Appendix A: Speakers; Appendix B: Previous Report Recommendations; Appendix C: Committee Questions to NIJ; Appendix D: Biographical Sketches of Committee Members
Sommario/riassunto	"Reliable and valid forensic science analytic techniques are critical to a credible, fair, and evidence-based criminal justice system. There is widespread agreement that the scientific foundation of some currently available forensic science methods needs strengthening and that additional, more efficient techniques are urgently needed. These needs can only be met through sustained research programs explicitly designed to ensure and improve the reliability and validity of current methods and to foster the development and use of new and better techniques. This task is challenging due to the broad nature of the field. Concerns have been raised repeatedly about the ability of the criminal justice system to collect and analyze evidence efficiently and to be fair in its verdicts. Although significant progress has been made in some forensic science disciplines, the forensic science community

still faces many challenges. Federal leadership, particularly in regard to research and the scientific validation of forensic science methods, is needed to help meet the pressing issues facing state and local jurisdictions. This report reviews the progress made by the National Institute of Justice (NIJ) to advance forensic science research since the 2009 report, Strengthening Forensic Science in the United States: A Path Forward and the 2010 report, Strengthening the National Institute of Justice. Support for Forensic Science Research examines the ways in which NIJ develops its forensic science research priorities and communicates those priorities as well as its findings to the scientific and forensic practitioner communities in order to determine the impact of NIJ forensic science research programs and how that impact can be enhanced"--Publisher's description
