as contex : the legal, fiscal, and social imperative to deliver inclusive e-content / Lisa Pappas -- Resources / Allison Maloney.

| Sommario/riassunto | Rhetorical Accessability is the first text to bring the fields of technical communication and disability studies into conversation. The two fields also share a pragmatic foundation in their concern with accommodation and accessibility: the material practice of making social and technical environments and texts as readily available, easy to use, and/or understandable as possible to as many people as possible, including those with disabilities. |
