

1. Record Nr.	UNINA9910823094503321
Autore	Bagrintseva K. I (Kseniia Ivanovna)
Titolo	Carbonate reservoir rocks // Ksenia I. Bagrintseva
Pubbl/distr/stampa	Beverly, Massachusetts ; ; Hoboken, New Jersey : , : Scrivener Publishing : , : Wiley, , 2015 ©2015
ISBN	1-119-08400-8 1-119-08398-2 1-119-08399-0
Descrizione fisica	1 online resource (355 p.)
Disciplina	553.2/8
Soggetti	Carbonate reservoirs Petroleum - Geology Carbonate rocks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Carbonate reservoir rock properties and previous studies -- Major sedimentational environments of carbonate rocks in sedimentary basins -- Conditions of void space formation in carbonate rocks of various compositions and genesis -- Reservoir rock study techniques -- Natural oil and gas reservoirs in carbonate formations of the Pre-Caspian province -- Natural oil and gas reservoirs in the Timan-Pechora province -- Types and properties of the Rhiphaean carbonate reservoir rocks -- Theoretical fundamentals of the reservoir rock evaluation and forecast -- Major factors determining the formation and preservation of high-capacity carbonate reservoir rocks.
Sommario/riassunto	Most of the world's energy still comes from fossil fuels, and there are still many strides being made in the efficiency and cost effectiveness of extracting these important and increasingly more elusive natural resources. This is only possible if the nature of the emergence, evolution, and parameter estimation of high grade reservoir rocks at great depths is known and a theory of their forecast is developed. Over 60 percent of world oil production is currently associated with carbonate reservoir rocks. The exploration, appraisal and development

of these fields are significantly complicated
