Disciplina	616.1029384
Soggetti	Health care administration Health care Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Small Ideas for Saving Big Health Care Dollars; References; About This Report; RAND Health; Copyright
Sommario/riassunto	A focused review of RAND Health research identified small ideas that could save the U.S. health care system 13 to 22 billion per year if successfully implemented. They include changing payment policy for emergency transport and greater use of 4 generic drugs. Small ideas do not require systemic change; thus, they may be both more feasible to operationalize and less likely to encounter stiff political and organizational resistance.
