Economic Design of Libraries Based on Visionary Building Plans, Adaptive Architecture, Compact Storage, and Streamlining of Services -- 13. Corners -- Contributors
Sommario/riassunto	This publication brings together a range of building projects from National, Academic and Public Libraries from different countries of the world showing how these libraries are able to continue to provide high quality library space that is affordable in times of difficult economic

circumstances. We will hear about the building processes, co-operation with architects and engineers and how librarians and users have reacted to these new buildings.

Note generali	The individual (as the name for that which is dispersed in the

environment of the problem of the subject) is socially determined in its realization: the individual is formed (socialized, disciplined, subjectivized) – and must also, either parallel to or against this, form itself, self-direct its own individuation and authentication. Joachim Renn's study shows how 'self-realization' as 'differentiation' can be the basic figure of a pragmatic sociology of the 'subjective' in society. The central theoretical problem then becomes the relationship between general forms of the genesis of subjective self-relations and the socio-historical variation of interlocking and diffusion of subject formats and subjective 'self-relations'.

Nota di bibliografia

Includes bibliographical references at the end of each chapters.

Sommario/riassunto

Die Person (als Name für Zerstreutes im Umfeld des Subjektproblems) wird sozial zur Entfaltung bestimmt: Sie wird geformt (sozialisiert, diszipliniert, subjektiviert) – und muss sich zudem, parallel oder widerständig zur Formung, »selbst« entfalten, eigensteuern, individuieren, authentifizieren. Joachim Renns Studien zeigen: »Selbstentfaltung« als »Ausdifferenzierung« kann die Grundfigur einer pragmatistischen Soziologie des »Subjektiven« in der Gesellschaft sein. Das zentrale theoretische Problem ist dann das Verhältnis zwischen allgemeinen Formen der Genese subjektiver Selbstverhältnisse und der historisch-gesellschaftlichen Varianz des Ineinandergreifens und Auseinandertretens von Subjektformaten und subjektivem »Selbstbezug«.

»Ambitioniert, voraussetzungsvoll und herausfordernd – sprachlich, theoretisch und auch politisch.«
