	Sommario/riassunto	"The mental health of school leaders and managers is just as important as the well-being of those they teach and support. Recent research has revealed some alarming statistics, including that 56 per cent of senior

leaders have experienced mental ill health in the last year. This book examines a range of relevant issues including workload, inspections, partnerships and approaches to leadership and management in order to address some of these concerns, and it provides comprehensive guidance and workable, evidence-informed strategies to support those with leadership roles in schools and colleges."--
