

1. Record Nr.	UNINA9910823263503321
Autore	Kunter Gero
Titolo	Compound stress in English : the phonetics and phonology of prosodic prominence // Gero Kunter
Pubbl/distr/stampa	Berlin, : De Gruyter, 2011
ISBN	1-283-16676-3 9786613166760 3-11-025470-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (240 p.)
Collana	Linguistische Arbeiten, , 0344-6727
Classificazione	HF 260
Disciplina	421.58
Soggetti	English language - Compound words English language - Intonation English language - Accents and accentuation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front matter -- Contents -- Acknowledgements -- 1 Introduction -- 2 Compounds, stress and prominence: concepts and issues -- 3 The corpus -- 4 Perception of compound prominence patterns -- 5 Acoustic correlates of compound prominence -- 6 Classification and prediction of compound prominence patterns -- 7 What determines compound prominence patterns? -- 8 Within- and across-speaker variation -- 9 Conclusion -- A Introduction to linear regression and mixed-effects models -- B NOUN + NOUN compounds used in the variability study -- References
Sommario/riassunto	This volume addresses several claims about the two prominence patterns found in English nominal compounds in a rigorously empirical way. Listener proficiency to identify these patterns is investigated, and the acoustic properties that distinguish the patterns are identified. These properties are used to predict statistically the prominence pattern of any given compound. The book further analyzes the semantic and structural factors influencing the distribution of the prominence patterns, and addresses the extent of within- and across-speaker variability in English compound stress assignment.
