

1. Record Nr.	UNINA9910823291903321
Autore	Mancas Christian
Titolo	Conceptual data modeling and database design : a fully algorithmic approach. Volume 1, The shortest advisable path // Christian Mancas, Mathematics and Computer Science Department, Ovidius State University, Constanta, Romania, Computer Science
Pubbl/distr/stampa	Oakville, ON : , : Apple Academic Press, , [2016] ©2016
ISBN	0-429-15423-2 1-4987-2844-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (662 p.)
Disciplina	005.74/3
Soggetti	Computer algorithms Conceptual structures (Information theory) Database design
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	1. Data, information and knowledge in the computer era -- 2. The quest for data adequacy and simplicity : the entity-relationship data model (E-RDM) -- 3. The quest for data independence, minimal plausibility, and formalization : the relational data model (RDM) -- 4. Relational schemas implementation and reverse engineering -- 5. Conclusion.
Sommario/riassunto	This new book aims to provide both beginners and experts with a completely algorithmic approach to data analysis and conceptual modeling, database design, implementation, and tuning, starting from vague and incomplete customer requests and ending with IBM DB/2, Oracle, MS SQL Server, or Access-based software applications. A rich panoply of solutions to actual useful data sub-universes-such as business, university, public and home library, geography, and history-is provided, constituting a powerful library of examples.
