Sommario/riassunto	The issue at stake in this volume is the role of science as a way to fulfil a quest for knowledge, a tool in the exploration of foreign lands, a central paradigm in the discourse on and representations of otherness. The interweaving of scientific and ideological discourses is not limited

to the geopolitical frame of the British empire in the nineteenth and early twentieth centuries but extends to the rise of the American empire as well. The fields of research tackled are human and social scie...
