

1. Record Nr.	UNINA9910823308103321
Autore	Lang Walter
Titolo	Sensors and measurement systems // Walter Lang
Pubbl/distr/stampa	Denmark : , : River Publishers, , [2019] 2019
ISBN	1-00-333947-6 1-003-33947-6 1-000-79398-2 1-000-79368-0 87-7022-027-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (244 pages)
Collana	River Publishers series in electronic materials and devices
Disciplina	610.28
Soggetti	Biosensors - Design and construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	Sensors and measurement systems is an introduction to microsensors for engineering students in the final undergraduate or early graduate level, technicians who wants to know more about the systems they are using, and anybody curious enough to know what microsystems and microsensors can do. The book discusses five families of sensors: - Thermal sensors - Force and pressure sensors- Inertial sensors - Magnetic field sensors- Flow sensorsFor each sensor, theoretical, technology and application aspects are examined. The sensor function is modelled to understand sensitivity, resolution and noise. We ask ourselves: What do we want to measure? What are possible applications? How are the sensor chips made in the cleanroom? How are they mounted and integrated in a system?After reading this book, you should be able to:- Understand important thermal, mechanical, inertial and magnetic sensors- Work with characterization parameters for sensors- Choose sensors for a given application and apply them- Understand micromachining technologies for sensors.
