1.

goals for the management of adult lumbar scoliosis, this practical and comprehensive guide covers everything from pre-operative evaluation and radiography to post-operative management and complications. Both non-operative and operative strategies are presented, including minimally invasive techniques, decompression, anterior release, spinal osteotomy, biologics, and proximal and distal fixation, with an emphasis on clinical guidelines and management outcomes. The impact and prevention of complications following treatment are also discussed, including the prevention of proximal junctional kyphosis. Concluding with an examination of future directions for research and clinical treatment strategies, the comprehensive approach of this book provides the orthopedic surgeon, neurosurgeon and spinal practitioner with the most current evidence and expert thought about the evaluation and management of adult lumbar scoliosis.

Sommario/riassunto	Shifting our thinking to help break the cycle of bullying We all know bullying impacts the academic and emotional lives of our young people. We see it in our schools and hear about it in the news. If we know it's a problem, why is it still happening? Often it's because we fail to address the individuals at the heart of the problem, the kids who engage in the behavior. In Working With Kids Who Bully Walter Roberts challenges us to shift our thinking about these youth and offers innovative approaches to help kids pull back from and stop bullying. Readers will find Information on a range of topics impacting schools today, including cyberbullying, relational aggression, mediation, building empathy, and bibliomedia therapy Strategies and sample dialogue to use when intervening with kids who bully Diagrams and charts to clarify suggested approaches Written by one of the nation's foremost experts on bullying, this is a book designed to stimulate change and ultimately help create safer learning environments for all kids. Lots of times we focus on helping the victims, but Walter Roberts addresses how to help parents of children who are bullying, as they need tips rather than shaming. Brigitte Tennis, Headmistress & Eighth Grade Teacher Stella Schola Middle School The strengths of Working With Kids Who Bully are the vignettes posed, the reflection for analyzing the bullying situation, and the suggestions, almost specific guidance, for responding in a timely and empathetic manner. Dana Salles Trevethan, Interim Superintendent Turlock Unified School District.
