Responses to a Financial Crisis in Foreign Economy with Financial Contagion: Domestic Economy-The Role of Monetary Policy Strategy 8. Responses to a Financial Crisis in Foreign Economy without Financial Contagion: Domestic Economy-The Role of Monetary Policy Strategy
Sommario/riassunto	The recent global financial crisis was the first in recent history that was triggered by problems in the financial system of the mature economies. Existing work on financial crisis in emerging market countries, however, almost exclusively focus on the role of financial frictions in the domestic economy. In contrast, we propose a two-country DSGE model to investigate the transmission of a global financial crisis that originates from financial frictions in the rest of the world. We find that

the scale of financial spillovers from the global to the domestic economy and trade openness are key determinants of the severity of the financial crisis for the domestic economy. Our results also suggest that the welfare ranking of alternative monetary policy regimes is determined by the degree of financial contagion, the degree of trade openness as well as the scale of foreign currency denominated debt in the domestic economy.

Security -- Building the Bridges to Security -- It's All About the Cocoa Beans -- Organizational Intelligence -- Improving Women's Participation in the Security Field Through Alternative Careers -- Conclusion.

Sommario/riassunto

This volume examines core areas of development in security, emphasizing the pivotal contributions of women to the field's evolution. The author first covers a broad spectrum of key topics, including how security is created, where innovation occurs, what the underpinnings are, and who supports it and how. After an overview of the field, female security professionals share their own stories of technology and innovation in security today; the foundation, where research is headed, and the emerging trends. Women currently make up a very small pocket of cyber security staffing – this book aims to increase the visibility of women in the field and their contributions and encourage other females to join the field. The contributors hold various roles from executive leadership, to engineers, analysts, and researchers. Identifies technology and innovation achievements from women in security Demonstrates the diverse segments, opportunities, and talents that make up the field of security Presents developments and advancements in cybersecurity and showcases women who are leading the way.

Nota di contenuto	The Concept of Scrutiny -- From Debunking Urban Legends to Political Fact-Checking -- Urban Legends and Rumors Concerning the September 11 Attacks -- Debunking as Hobby, Entertainment, Scholarly Pursuit, and Public Service -- Recent Political Fact-Checking -- Where Do We Go Next?.
Sommario/riassunto	This text presents an historical examination of political fact-checking, highlighting how this is part of a larger phenomenon of online scrutiny that manifests itself in multiple forms. Reflecting the long history of “fake facts” in America, the book discusses important developments in this area from the emergence of the public Internet in the 1990s to the start of the Trump-Clinton presidential election campaigns. Topics and features: Describes how some of the major players in political fact-checking began with the purpose of scrutinizing and debunking of urban legends Considers how this was part of a wider culture,

encompassing B-grade horror movies, truth-or-fiction television shows, and groups warning about computer viruses Explains how such developments are connected, revealing political fact-checking as one of many forms of scrutiny applied in the face of a complex, dangerous world Provides a range of detailed case studies, covering such topics as the rumors surrounding the 9/11 terrorist attacks, and academic interest in contemporary legends Discusses how pre-Internet technologies such as bulletin boards, Usenet, and proprietary online service providers such as CompuServe and AOL were used to both disseminate and debunk urban legends Examines the rise of political fact-checking, reviewing all of the major initiatives in this area undertaken in the United States This timely study touches on issues of popular culture and major events, and offers profiles of colorful individuals and organizations, and as such will appeal to a broad audience interested in the history of fact-checking and efforts to protect the political process from falsehoods. Dr. William Aspray is a full professor in the Department of Information Science at the University of Colorado Boulder. His other publications include the Springer books Participation in Computing: The National Science Foundation's Expansionary Programs and Women and Underrepresented Minorities in Computing: A Historical and Social Study. Dr. James W. Cortada is a Senior Research Fellow at the Charles Babbage Institute at the University of Minnesota.
