Sommario/riassunto

Governing by Numbers is a jargon-free account of how delegated
legislation - laws that do not pass through the full legislative scrutiny
to which Acts of Parliament are subjected - is made. It is based on new
research involving an analysis of nearly 30,000 pieces of delegated
legislation; detailed investigation of 46 recent regulations based on in-
depth interviews with those involved in developing, writing and
scrutinising them and a major survey of nearly 400 interest groups.
Delegated legislation is examined as a form of "everyday policy-
making". It deals with important issues, from the level of welfare
benefits to weapons exports, animal health and the prevention of air
pollution, yet has been largely ignored in studies of the British political
and administrative system. This book analyses the distinctive character
of everyday policy making and the implications of how it works for our
understanding of British democracy
