Sommario/riassunto	A special course adoption price is available for an order of six or more copies from a university bookstore. Contact sales-us@brill.com or sales-nl@brill.com to learn more. This second edition of Cases and Materials on the Law of the Sea has been updated to address significant developments that have occurred in the law of the sea since the publication of the first edition in 2004. The text compiles cases, treaties, U.N. documents, commentaries, and other teaching materials that systematically present law of the sea topics while placing those issues in the broader context of international law and international legal process. The book incorporates relevant historical materials

alongside materials addressing more recent topics, such as port security, the depletion of fish stocks, and the operation of new international institutions. Extensive notes and discussion questions engage readers and enhance their understanding of the materials.
