Sommario/riassunto

Publié dans le prolongement du colloque international sur la Crète qui s'est tenu à Montpellier en novembre 2013, ce livre rassemble 20 communications inédites sur l'histoire de la plus grande des îles de la mer Égée de l'Antiquité jusqu'au xx^e siècle. Trois thèmes structurent cet ouvrage collectif : les figures naturelles et culturelles, les symboles et les traits de l'identité crétoise et des identités minoritaires insulaires ; les regards savants occidentaux et grecs portés sur la Crète ; la place politique, religieuse et stratégique que cette marche frontière insulaire tient dans les luttes passées pour la domination de la Méditerranée orientale. Published a year and a half after an international conference on Crete took place at Montpellier, this book presents the principal results of this meeting and its works. All written or translated in French, some 20 original articles are dealing with the history of the largest Egean Island from the Ancient Times up to the XXth Century. Three major themes organize this book: the natural and cultural symbols and features of Cretan common and subaltern identities; the western learned representations of Creta; the political, religious and strategic importance of an insular frontier and place of arms in the past struggles for the supremacy over the Eastern Mediterranean.

Soil in the shamanism mythology and rituals in Northern Eurasia Pavel Krasilnikov. Completed -- 4. From Native American tradition to modern day America, Native origin legends that involve soil and Earth Jeffrey Homburg, Sabine Grunwald, and Eric Brevik. (Sample chapter available below) -- 5. The Dogon: The creation of consciousness through agriculture Eva Wertenschlag-Birkhäuser. Completed -- 6. The Yoruba pedosphere: The tale of Onilé Guilherme Sobrinho and Nilton Silva. In revision -- 7. Importance of soil in Islam, a study based on statements in the Quran

Mohsen Makki and Jérôme Juilleret. In revision -- 8. Soil in Rumi's thoughts Seyed Kazem Alavipanah, Jafar Jafarzadeh, and Kolsoum Ghazanfari. In revision -- 9. Cultural understanding of soil in China Sylvia Xiaorui Wen. Completed -- 10. Cultural understanding of soil from a Japanese perspective Hideaki Hirai and Katsuyuki Minami. Completed -- 11. Ecosattvas and Ecodharma – Modern Buddhist perspectives of soil and the environment Sabine Grunwald. Completed -- 12. Technosol cultures: New cultural understandings of urban soils Germain Meulemans. Completed -- C. Politics on Soil -- 13. Sacred soil, divine labor: Economic theology and the agrarian political in Eastern India Milinda Banerjee. In revision -- 14. A deity we belong to or a property to own? Land & people relations in Buryat communities of the Sayan mountains Tatiana Intigrinova. Completed -- D. Case Studies on the Inner Soil of Individual Scientists -- 15. The salt of the earth": Bernard Palissy (1510-1590) between soil science and religion Christian Feller, Jean-Paul Aeschlimann, and Nikola Patzel. Chapter in revision -- 16. Darwin and the earthworm: From God the father to mother earth Christian Feller, Laurence Feller Giraud, and Nikola Patzel. Chapter in revision -- E. Conceptual approaches and ethical perspectives -- 17. Inner and Outer soil. Nikola Patzel. In revision -- 18. Soil care: From intention to action Anna Krzywoszynska. Chapter completed -- 19. Soil care, culture and eco-identities Sabine Grunwald and Kay R. Kastner-Wilcox. Completed -- 20. Take care of soils: Toward a pluralistic integral soil ethics Sabine Grunwald. Completed -- F. Soil Education and Cultural Language of the Soil -- 21. Roots of soil perceptions by university and secondary school's students in Minas Gerais, Brazil Cristine C. Muggler, Arthur S. Gasparini and Débora C.L. dos Santos. Chapter in revision -- 22. Degrees pursued by students in different countries to train for careers in soil science Eric C. Brevik, Damien Field, Jacqueline Hannam, Maja Krzic, Rainer Horn, Cristine Muggler, Jude Odhiambo, Yoshitaka Uchida, Danny Itkin, Hong-sheng Wu, Liana Pozza, Laura Bertha Reyes Sánchez, and Thomas Scholten. Chapter completed -- 23. Proverbs on soils Jay E. Yang, H.S. Kim, P. Borrelli and M.B. Kirkham. Chapter completed -- G. Concluding Remarks and Outlook -- 24. Conclusions Nikola Patzel, Eric Brevik, Sabine Grunwald, and Christian Feller. Chapter in preparation.

Sommario/riassunto

Cultural understandings of soil are diverse and often ambiguous. Cultural framing of soils is common worldwide and is highly consequential. The implications of what place the earth has in people's world view and everyday life can be in line or in conflict with natural conditions, scientific views, or agricultural practices. The main assumption underlying this work is that soil is inescapably perceived in a cultural context by any human. This gives emergence to different significant webs of meaning influenced by religious, spiritual, or secular myths, and by a wide range of beliefs, values and ideas that people hold in all societies. These patterns and their dynamics inform the human-soil relationship and how soils are cared for, protected, or degraded. Therefore, there is need to deal inter-culturally with different sources and types of knowledge and experience regarding soil; a need to cultivate soil awareness and situationally appropriate care through inter- and intra-cultural dialogues and learning. This project focuses on the human and intangible dimensions of soil. To serve this aim, the International Union of Soil Sciences (IUSS) founded a working group on Cultural Patterns of Soil Understanding that has resulted in this book, which presents studies from almost all continents, written by soil scientists and experts from other disciplines. A major objective of this project is to promote intercultural literacy that gives readers the opportunity to appreciate soil across disciplinary and

Sommario/riassunto

The ultimate guide to dealing with hedge fund risk in a post-Great Recession world Hedge funds have been faced with a variety of new challenges as a result of the ongoing financial crisis. The simultaneous collapse of major financial institutions that were their trading counterparties and service providers, fundamental and systemic increases in market volatility and illiquidity, and unrelenting demands from investors to redeem their hedge fund investments have conspired to make the climate for hedge funds extremely uncomfortable. As a result, many funds have failed or been forced to c
