Sommario/riassunto	In January 2000, ISNAR began the ambitious Evaluating Capacity Development Project, which aimed to improve capacity development efforts in research and development organizations through the use of

evaluation. This book explains how the project used an action-learning approach, bringing together people from various countries and different types of organizations. As they conducted six evaluation studies over the course of 3 years, project participants learned a great deal about capacity development and the process of evaluation. The authors use examples and lessons drawn from the evaluation stud
