

1. Record Nr.	UNINA9910823612503321
Autore	Gucer Vasfi
Titolo	Certification study guide : IBM Tivoli Configuration Manager (ITCM) version 4.2.2 // Vasfi Gucer, Sanver Ceylan
Pubbl/distr/stampa	Austin, TX, : IBM, International Technical Support Organization, c2005
Edizione	[1st ed.]
Descrizione fisica	1 online resource (386 p.)
Collana	Redbooks
Disciplina	004.076
Soggetti	Electronic data processing personnel - Certification Software configuration management - Examinations Software maintenance - Examinations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"IBM Tivoli Configuration Manager Version 4.2.2, IBM Tivoli Management Framework Version 4.1.1." "March 2005."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front cover -- Contents -- Figures -- Tables -- Notices -- Trademarks -- Preface -- The team that wrote this redbook -- Become a published author -- Comments welcome -- Chapter 1. Certification overview -- 1.1 IBM Professional Certification Program -- 1.1.1 Benefits of certification -- 1.1.2 Tivoli Software Professional Certification -- 1.2 IBM Tivoli Configuration Manager V4.2.2 Implementation Certification -- 1.2.1 Test 870 objectives -- 1.2.2 Discount when taking the Test 870 -- 1.3 Recommended resources for study -- 1.3.1 Courses -- 1.3.2 Publication -- Chapter 2. Tivoli Management Framework basics -- 2.1 Components of the basic Tivoli architecture -- 2.2 Tivoli user interfaces -- 2.2.1 Tivoli Desktop -- 2.2.2 Command line interface -- 2.2.3 Navigating the Tivoli Desktop -- 2.3 Tivoli resources -- 2.4 Authorization roles -- 2.4.1 Scope of authorization roles -- 2.5 Tivoli profiles -- 2.5.1 Profile managers and profile distribution -- 2.6 Multiplexed distribution services -- 2.6.1 MDist and MDist 2 -- 2.6.2 MDist 2 functions -- 2.6.3 MDist2 components -- 2.6.4 wmdist command -- 2.6.5 Using the Distribution Status console -- 2.7 Connecting multiple TMR regions -- 2.7.1 Benefits of connecting TMRs -- 2.7.2 Connection types -- 2.7.3 Name registry -- 2.7.4 Case study: Hub-spoke architecture -- 2.8 Endpoint login sequence -- 2.8.1 Initial

login without a select_gateway_policy script -- 2.8.2 Initial login with a select_gateway_policy script -- 2.8.3 Normal login -- 2.8.4 Isolated login -- 2.8.5 Orphan login -- 2.8.6 Implementing policy scripts -- 2.9 Firewall Security Toolbox -- 2.9.1 Tivoli environment with a firewall -- 2.9.2 Tivoli environment with demilitarized zones -- 2.9.3 Sending events across firewalls -- 2.10 Installing Firewall Security Toolbox -- 2.10.1 Installing on UNIX operating systems. 2.10.2 Installing on Windows operating systems -- Chapter 3. Tivoli Configuration Manager fundamentals and installation -- 3.1 IBM Tivoli Configuration Manager fundamentals -- 3.1.1 Tivoli Configuration Manager components and services -- 3.2 Creating a deployment plan for Tivoli Configuration Manager -- 3.3 How to deploy Tivoli Configuration Manager components -- 3.3.1 Distributed Configuration Manager components -- 3.3.2 TMR server configuration -- 3.3.3 Components for managed nodes -- 3.3.4 Components for gateways -- 3.3.5 Components for endpoints -- 3.4 Required roles for installation -- 3.5 RDBMS considerations -- 3.6 RIM considerations -- 3.7 General pre-install checks, hints, and tips -- 3.7.1 UNIX -- 3.7.2 Windows Systems on Intel® 486 or Pentium® systems -- 3.8 Installation methods -- 3.9 Overview of Integrated Install -- 3.10 Server Install -- 3.10.1 Typical Server Install -- 3.10.2 Custom Server Install -- 3.10.3 Starting the installation programs -- 3.11 Desktop Install -- 3.11.1 Starting the installation program -- 3.12 Web Gateway Install -- 3.12.1 Web Gateway prerequisites -- 3.12.2 Starting the installation program -- 3.12.3 Multiple endpoints installation -- 3.13 Uninstallation of IBM Tivoli Configuration Manager -- Chapter 4. Inventory and Software Distribution components -- 4.1 Inventory component -- 4.1.1 What is gathered by Tivoli Inventory -- 4.1.2 Inventory architecture -- 4.1.3 Collection Table of Contents -- 4.1.4 Collection files -- 4.1.5 Inventory Collectors -- 4.1.6 Collection manager -- 4.1.7 Data Handler -- 4.1.8 Status Collector -- 4.1.9 Callback object -- 4.1.10 Managing data collection -- 4.1.11 Clearing the Collector -- 4.1.12 Inventory collection scenarios -- 4.1.13 Custom scans -- 4.1.14 Isolated scans -- 4.1.15 Querying inventory data -- 4.2 Software Distribution component. 4.2.1 Components of Tivoli Software Distribution -- 4.2.2 Software distribution process overview -- 4.3 Data Moving -- 4.3.1 Using the Data Moving Service -- 4.4 Enterprise Data Warehouse integration -- Chapter 5. Deployment Services -- 5.1 Activity Planner -- 5.1.1 Activity Planner components -- 5.1.2 Roles required for the Activity Planner -- 5.1.3 Types of activities -- 5.1.4 Activity Plan Editor -- 5.1.5 Activity Plan Monitor -- 5.1.6 Activity Planner commands -- 5.2 Change Manager -- 5.2.1 Change Manager components -- 5.2.2 Sample Change Manager scenario -- 5.3 Enterprise Directory integration -- 5.3.1 Exchanging data with a directory server -- 5.3.2 Manipulating DirectoryContext objects -- 5.3.3 Directory query libraries and query directories -- 5.4 Resource Manager and pervasive devices -- 5.4.1 Choosing where to install the Resource Manager components -- 5.4.2 Web Gateway installation -- 5.4.3 Web objects -- 5.4.4 Registering the resource types -- 5.4.5 Associating endpoints with the resource gateway -- 5.4.6 Enrolling pervasive devices -- 5.4.7 Installing and configuring devices for resource manager -- 5.4.8 Installing the device agent for Windows CE devices -- 5.4.9 The user ID of palm devices -- 5.4.10 Inventory scans on pervasive devices -- 5.5 Pristine Manager -- 5.5.1 Pristine Manager architecture and new components -- 5.5.2 Supported platforms for pristine installation -- 5.5.3 Key terms -- 5.5.4 Pristine Manager concepts -- 5.5.5 Prerequisites -- 5.5.6 Installing pristine machines -- 5.5.7 Customizing Pristine Manager --

5.5.8 Adding an Operating System Element to a reference model --
5.5.9 Pristine Manager commands -- 5.5.10 IBM Tivoli Enterprise
Console notification -- Chapter 6. Multicast concepts and
implementation -- 6.1 Reliable multicast protocol -- 6.2 Hyper
Delivery (RMTP) flow -- 6.3 Distributed depot service.
6.3.1 Configuring repeaters for multicast -- 6.4 Endpoint multicast
receivers -- 6.4.1 Configuring endpoint to receive multicast -- 6.5
Multicast scenarios -- 6.5.1 Preloading MDist2 depots with multicast
-- 6.5.2 Multicast from gateways to Tivoli Management Agents -- 6.6
Multicast limitations -- 6.7 Troubleshooting multicast -- 6.7.1
Repeater multicast log -- 6.7.2 Endpoint receiver log and structure --
6.7.3 Best practices and tips -- Chapter 7. Troubleshooting IBM Tivoli
Configuration Manager -- 7.1 Generic problem determination outline
-- 7.2 Troubleshooting Framework 4.1.1 -- 7.3 Autotrace -- 7.4
Troubleshooting Software Distribution -- 7.4.1 General
troubleshooting -- 7.4.2 Check the log -- 7.4.3 Check the Distribution
Status Console -- 7.4.4 Make sure that Tivoli Framework is functional
-- 7.4.5 Check for MDist2 problems -- 7.4.6 Troubleshooting the
software package -- 7.4.7 Software Distribution traces -- 7.4.8
Troubleshooting Data Moving -- 7.4.9 Troubleshooting Mobile
Computing -- 7.4.10 Troubleshooting pristine installations -- 7.4.11
Troubleshooting discovering and synchronization -- 7.4.12 Change
Management Status summary -- 7.5 Troubleshooting Activity Planner
-- 7.5.1 Activity Planner processes -- 7.5.2 Activity Planner
configuration file -- 7.5.3 Activity Planner logfiles -- 7.5.4 Activity
Planner trace files -- 7.6 Troubleshooting Change Manager -- 7.6.1
Change Manager configuration file -- 7.6.2 Change Manager logfiles --
7.6.3 Change Manager trace files -- 7.7 Troubleshooting Web Gateway
and Device Management -- 7.7.1 Tracing the Web Gateway -- 7.8
Troubleshooting Web User Interface -- 7.8.1 Common Web User
Interface problems -- 7.8.2 Tracing the Web User Interface -- 7.9
Troubleshooting Enterprise Directory Integration -- 7.10
Troubleshooting Inventory -- 7.10.1 Enabling logging and tracing --
Appendix A. Lab exercises.
Introduction -- LAB 1 Using Integrated Install method to install a Tivoli
Server -- What this exercise is about -- What you should be able to do
-- Required materials -- Exercise instructions -- Install your Tivoli
Server with all ITCM modules -- Exercise review/wrap-up -- LAB 2.
Using Integrated Install method to install a Tivoli server -- What this
exercise is about -- What you should be able to do -- Introduction --
Required materials -- Exercise instructions -- Exercise review/wrap-up
-- LAB 3. Create an Inventory profile and run a hardware scan -- What
this exercise is about -- What you should be able to do -- Required
materials -- Exercise instructions -- Create a hardware profile with
SMBIOS capabilities -- 7.10.2 Distribute the profile -- LAB 4. Create an
Inventory profile and run and cancel the software scan -- What this
exercise is about -- What you should be able to do -- Required
materials -- Exercise instructions -- Create an Inventory profile for
software scan -- Distribute the profile and cancel the distribution --
LAB 5. Create a Custom Query with where clauses -- What this exercise
is about -- What you should be able to do -- Required materials --
Exercise instructions -- Create a query library -- Create a query -- LAB
6. Create and install software packages for Windows -- What this
exercise is about -- What you should be able to do -- Required
materials -- Exercise instructions -- Install the Software Package Editor
-- Create a simple package -- Test the software package -- Import the
software package -- Install the software package -- Verify the
distribution was successful -- Install software package in transactional

mode and commit installation -- Undo an installation -- Repair a damaged distribution -- Add links, registry keys, and text file objects -- LAB 7. Creating a software package using AutoPack.

What this exercise is about.

Sommario/riassunto

This IBM Redbooks publication is a study guide for IBM Tivoli Configuration Manager Version 4.2.2 and is aimed at the people who want to get IBM Certifications in this specific product. The IBM Tivoli Configuration Manager Certification, offered through the Professional Certification Program from IBM, is designed to validate the skills required of technical professionals who work in the implementation of the IBM Tivoli Configuration Manager Version 4.2.2 product. This book provides a combination of theory and practical experience needed for a general understanding of the subject matter. It also provides sample questions that will help in the evaluation of personal progress and provide familiarity with the types of questions that will be encountered in the exam. This publication does not replace practical experience, nor is it designed to be a stand-alone guide for any subject. Instead, it is an effective tool that, when combined with education activities and experience, can be a very useful preparation guide for the exam. Please note that the additional material referenced in the text is not available from IBM.
