Sommario/riassunto	`College Chemistry-II` is written in accordance with the current syllabus of the Bangalore University for B. Sc. (II Semester) students with chemistry as an optional subject. The main aim of this book is to discuss the concepts and basics of chemistry in a simple and comprehensive style. The important concepts of chemical bonding and structures of molecules are dealt in a precise manner. The mechanisms of suggested reactions in organic chemistry are explained in detail for easy understanding. Solved numerical problems in the chapters of physical chemistry are expected to provide clarity of the
