Sommario/riassunto	This is an authoritative sourcebook on a major strand of Group Relations Theory - "learning from experience". This approach was developed jointly from psychoanalytic and open systems theories,

including those of Bion, Kegan, Klein and Freud. It will be invaluable for all those involved in working with groups and organisations. The papers in this collection look at the underlying theory and the practical application of learning from experience. They address the broad issues of authority, leadership and organisational culture, whilst concentrating on other issues in-depth, such as inter-group conflict, and gender and race relations in the workplace.
