Autore Johnson-Freese Joan

Titolo Heavenly ambitions: America's quest to dominate space / / Joan

Johnson-Freese

Pubbl/distr/stampa Philadelphia, : University of Pennsylvania Press, c2009

ISBN 1-283-89074-7

0-8122-0236-8

Edizione [1st ed.]

Descrizione fisica 1 online resource (190 p.)

Disciplina 629.4/10973

Soggetti Astronautics and state - United States

Space race - United States

Lingua di pubblicazione Inglese

Formato Materiale a stampa

Livello bibliografico Monografia

Note generali Bibliographic Level Mode of Issuance: Monograph

Nota di bibliografia Includes bibliographical references and index.

Nota di contenuto Frontmatter -- Contents -- Acronyms -- Preface -- Chapter. One

Space -- Chapter Two. The Evolution of U.S. Space Policy -- Chapter Three. Space Weapons -- Chapter Four. Strategic Communications -- Chapter Five. Diplomacy and Arms Control -- Chapter Six. Globalizing

Space -- Notes -- Index -- Acknowledgments

Sommario/riassunto In the popular imagination, space is the final frontier. Will that frontier

be a wild west, or will it instead be treated as the oceans are: as a global commons, where commerce is allowed to flourish and no one country dominates? At this moment, nations are free to send missions to Mars or launch space stations. Space satellites are vital to many of the activities that have become part of our daily lives-from weather forecasting to GPS and satellite radio. The militaries of the United States and a host of other nations have also made space a critical arena-spy and communication satellites are essential to their operations. Beginning with the Reagan administration and its attempt to create a missile defense system to protect against attack by the Soviet Union, the U.S. military has decided that the United States should be the dominant power in space in order to protect civilian and defense assets. In Heavenly Ambitions, Joan Johnson-Freese draws from a

first, by politicizing the question of space threats and, second, by continuing to believe that military domination in space is the only way

myriad of sources to argue that the United States is on the wrong path:

to protect U.S. interests in space. Johnson-Freese, who has written and lectured extensively on space policy, lays out her vision of the future of space as a frontier where nations cooperate and military activity is circumscribed by arms control treaties that would allow no one nation to dominate-just as no one nation's military dominates the world's oceans. This is in the world's interest and, most important, in the U.S. national interest.
