Sommario/riassunto	The present book deals with an historical Castilian legal institution (tanteo comunal) that, in the modern age, allowed villages by means of lawsuits brought to the royal council of Castile to repurchase the offices related to their local government (regidores), previously privatized by the crown. In this regard, a survey has been carried on not only through the judicial practice of the time but also through the coeval legal doctrines (doctrina). "Derecho dominical y tanteo comunal" aims also to outline a comparison with more archaic actions (acciones populares) which were used, until then, by local communities against the usurpers of their own properties (bienes comunales), in order to obtain their restitution. To this regard, the results of this research highlight the strong relationship between the acciones populares and the tanteo comunal. However the institutional reforms, later undertaken

by the crown, deeply affected local government and eventually eclipsed this particular legal institution.

Sommario/riassunto	Where does our fascination for 'heritage' originate? This

groundbreaking comparative study of preservation in France, Germany and England looks beyond national borders to reveal how the idea of heritage emerged from intense competition and collaboration in a global context. Astrid Swenson follows the 'heritage-makers' from the French Revolution to the First World War, revealing the importance of global networks driving developments in each country. Drawing on documentary, literary and visual sources, the book connects high politics and daily life and uncovers how, through travel, correspondence, world fairs and international congresses, the preservationists exchanged ideas, helped each other campaign and dreamed of establishing international institutions for the protection of heritage. Yet, these heritage-makers were also animated by fierce rivalry as international tension grew. This mixture of international collaboration and competition created the European culture of heritage, which defined preservation as integral to modernity, and still shapes current institutions and debates.
