

1. Record Nr.	UNINA9910823894103321
Titolo	Deformation quantization : proceedings of the meeting of theoretical physicists and mathematicians, Strasbourg, May 31-June 2, 2001 = rencontre entre physiciens theoriciens et mathematiciens, Strasbourg, 31 mai-2 juin 2001 // editor Gilles Halbout
Pubbl/distr/stampa	Berlin ; ; New York : , : Walter de Gruyter, , 2002
ISBN	3-11-086622-6
Edizione	[Reprint 2012]
Descrizione fisica	1 online resource (244 p.)
Collana	IRMA Lectures in Mathematics and Theoretical Physics ; ; 1
Classificazione	SI 290
Altri autori (Persone)	HalboutGilles
Disciplina	530.14/3
Soggetti	Geometric quantization Mathematical physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front matter -- Preface -- Table of Contents -- Deformation quantization, methods and applications / Halbout, Gilles -- Deformation quantization: genesis, developments and metamorphoses / Dito, Giuseppe / Sternheimer, Daniel -- Deformation quantization of covariant fields / Dito, Giuseppe -- On the trace density in deformation quantization / Fedosov, Boris -- Deformed double Yangians and quasi-Hopf algebras / Arnaudon, Daniel / Avan, Jean / Frappat, Luc / Ragoucy, Eric -- On the representation theory of deformation quantization / Waldmann, Stefan -- Unimodular vector fields and deformation quantization / Roger, Claude -- Harrison cohomology and abelian deformation quantization on algebraic varieties / Frønsdal, Christian -- Related semi-classical and Toeplitz algebras / Monvel, Louis Boutet de -- Fedosov connections on jet bundles and deformation quantization / Cattaneo, Alberto S. / Felder, Giovanni / Tomassini, Lorenzo -- Quantization of Lie bialgebras via the formality of the operad of little disks / Tamarkin, Dimitri
Sommario/riassunto	This book contains eleven refereed research papers on deformation quantization by leading experts in the respective fields. These contributions are based on talks presented on the occasion of the meeting between mathematicians and theoretical physicists held in Strasbourg in May 2001. Topics covered are: star-products over

Poisson manifolds, quantization of Hopf algebras, index theorems, globalization and cohomological problems. Both the mathematical and the physical approach ranging from asymptotic quantum electrodynamics to operads and prop theory will be presented. Historical remarks and surveys set the results presented in perspective. Directed at research mathematicians and theoretical physicists as well as graduate students, the volume will give an overview of a field of research that has seen enormous activity in the last years, with new ties to many other areas of mathematics and physics.
