Sommario/riassunto	This text explores the implementation of international accountability for dependent territories under the United Nations during the early Cold War era. Although the Western nations that drafted the UN Charter saw the organization as a means of maintaining the international status quo they controlled, newly independent nations saw the UN as an instrument of decolonization and an agent of change disrupting global political norms. The book documents the unprecedented process through which these new nations came to wrest control of the United Nations from the World War II victors that founded it, allowing the UN to become a vehicle for global reform. It examines the consequences of

these early changes on the global political landscape in the midst of heightened international tensions playing out in Europe, the developing world, and the UN General Assembly.
