

1. Record Nr.	UNINA9910823995703321
Titolo	Blockchain and Web 3.0 : social, economic, and technological challenges // edited by Massimo Ragnedda and Giuseppe Destefanis
Pubbl/distr/stampa	London : , : Routledge, , 2020
ISBN	0-429-02953-5 0-429-63920-1
Descrizione fisica	1 online resource (xiv, 320 pages)
Collana	Routledge studies in science, technology, and society ; ; 41
Altri autori (Persone)	RagneddaMassimo <1976-> (Northumbria University, UK.) DestefanisGiuseppe (University of Hertfordshire, UK)
Disciplina	005.74
Soggetti	Blockchains (Databases) World Wide Web Disruptive technologies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1. Blockchain: a disruptive technology / Massimo Ragnedda and Giuseppe Destefanis -- Part I. Socio-economic aspects and consequences of decentralized technologies. Chapter 2. The block is hot: A commons-based approach to the development and deployment of blockchains / Sune Sandbeck, A.T. Kingsmith, Julian von Bargen ; Chapter 3. Can permissionless blockchains be regulated and resolve some of the problems of copyright law? / Guido Noto La Diega and James Stacey ; Chapter 4. Meetups: making space for women on the blockchain / Philippa R. Adams, Julie Frizzo-Barker, Betty B. Ackah, Peter A. Chow-White ; Chapter 5. Drivers of Digital Trust in the Crypto Industry / Scott Freeman, Ivana Beveridge, Jannis Angelis ; Chapter 6. Lightbulb Concrete / Bronwin Patrickson -- Part II. Blockchain and digital media. Chapter 7. Could blockchain save journalism? An explorative study of blockchain's potential to make journalism a more sustainable business / Walid Al-Saqaf and Malin Picha Edwardsson ; Chapter 8. The logics of technology decentralization - the case of Distributed Ledger Technologies / Balazs Bodo and Alexandra Giannopoulou ; Chapter 9. Disruptive Blockworks: blockchains and networks acceleration and collision / Matthew Lovett ; Chapter 10.

Blockchained to what (end)? A socio-material provocation to check distributed futures / Luke Heemsbergen, Alexia Maddox, Robbie Fordyce ; Chapter 11. Blockchain and data market. The case of Wibson from a critical perspective / Guillermina Yansen -- Part III. Technological aspects and consequences of decentralized technologies. Chapter 12. Applying smart contracts in online dispute resolutions on a large scale and its regulatory implications / Janet Hui Xue and Ralph Holz ; Chapter 13. SmartAnvil: open-source. Tool suite for smart contract analysis / Stephane Ducasse, Henrique Rocha, Santiago Bragagnolo and Marcus Denker ; Chapter 14. Managing CRM with fabric hyperledger blockchain technology / Dario Puligheddu, Roberto Tonelli and Michele Marchesi ; Chapter 15. Privacy with ethereum smart contracts / Duarte Teles and Isabel Azevedo ; Chapter 16. A hierarchical structure model of success factors for (blockchain-based) crowdfunding / Felix Hartmann, Xiaofeng Wang and Maria Ilaria Lunesu.

Sommario/riassunto

Blockchain is no longer just about bitcoin or cryptocurrencies in general. Instead, it can be seen as a disruptive, revolutionary technology which will have major impacts on multiple aspects of our lives. The revolutionary power of such technology compares with the revolution sparked by the World Wide Web and the Internet in general. Just as the Internet is a means of sharing information, so blockchain technologies can be seen as a way to introduce the next level: sharing value. Blockchain and Web 3.0 fills the gap in our understanding of blockchain technologies by hosting a discussion of the new technologies in a variety of disciplinary settings. Indeed, this volume explains how such technologies are disruptive and comparatively examines the social, economic, technological and legal consequences of these disruptions. Such a comparative perspective has previously been underemphasized in the debate about blockchain, which has subsequently led to weaknesses in our understanding of decentralized technologies. Underlining the risks and opportunities offered by the advent of blockchain technologies and the rise of Web 3.0, Blockchain and Web 3.0 will appeal to researchers and academics interested in fields such as sociology and social policy, cyberculture, new media and privacy and data protection.
