

1. Record Nr.	UNINA9910824025303321
Autore	Hedong Sun
Titolo	Advanced production decline analysis and application // edited by Sun Hedong
Pubbl/distr/stampa	Waltham, Massachusetts ; ; Oxford, England : , : Petroleum Industry Press : , : Gulf Professional Publishing, , 2015 ©2015
ISBN	0-12-802627-8
Descrizione fisica	1 online resource (352 p.)
Disciplina	622.338
Soggetti	Oil wells - Forecasting - Mathematical models Gas wells - Forecasting - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Title page; Copyright Page; Contents; About the author; Preface; Introduction; 1 - Fundamentals of Advanced Production Decline Analysis; 1.1 - History of Advanced Production Decline Analysis (APDA); 1.2 - Similarities and Differences between Production Decline Analysis and Well Test Analysis; 1.3 - Basic Concepts; 1.3.1 - Wellbore Storage Effect; 1.3.2 - Skin Effect; 1.3.3 - Apparent Wellbore Radius; 1.3.4 - Infinite Formation Line-Source Solution; 1.3.5 - Steady State, Pseudo-Steady State, and Boundary-Dominated Flows; 1.3.6 - Investigation Radius; 1.3.7 - Dimensionless Variables 1.3.8 - Shape Factor and Pseudo-Steady State Arrival Time1.3.9 - Superposition Principle; 1.3.10 - Pseudo-Pressure, Pseudo-Time; 1.3.11 - Material Balance Time; 1.3.12 - Flow Regime Identification; 1.3.13 - Type Curve Matching Principle; 1.3.14 - Recoverable Reserves; 1.3.15 - Dynamic Reserve; 2 - Arps Decline Curves Analysis; 2.1 - Arps Equations; 2.1.1 - Exponential Decline; 2.1.2 - Hyperbolic Decline; 2.1.3 - Harmonic Decline; 2.1.4 - Comparison of Three Decline Types; 2.1.5 - Modified Hyperbolic Decline; 2.1.6 - Fluid in Place and Drainage Area 2.2 - Theoretical Fundamentals of Arps Production Decline2.2.1 - Flow Rate Equation of Waterdrive Reservoir; 2.2.2 - Exponential Decline Equation of Waterdrive Reservoir; 2.2.3 - Hyperbolic Decline Equation

of Waterdrive Reservoir; 2.2.4 - Harmonic Decline Equation of Water Drive Reservoir; 2.2.5 - Decline Equation of Bounded Elastic Drive-Constant Pressure Production; 2.2.6 - Decline Equation of Multilayer Oil Well-Constant Pressure Production; 2.2.7 - Decline Equation of Gas Well in Volumetric Gas Reservoir-Constant Pressure Production; 2.3 - Arps Type Curves; 2.3.1 - Gentry-Arps Type Curve
 2.3.2 - Arps Dimensionless Decline Flow Rate Type Curve
 2.3.3 - Arps Dimensionless Decline Cumulative Production Curve; 2.3.4 - Arps Dimensionless Decline Flow Rate Integral Type Curve; 2.3.5 - Arps Dimensionless Decline Flow Rate Integral Derivative Type Curve; 2.3.6 - Arps Type Curve; 2.4 - Power Function Analysis; 2.4.1 - Iik Method; 2.4.2 - Mattar Method; 2.5 - Case Analysis of Arps Method; 2.5.1 - Identification of Decline Law; 2.5.2 - Arps Exponential Decline Analysis; 2.5.3 - Arps Harmonic Decline Analysis; 2.5.4 - Result Correlation and Analysis; 3 - Fetkovich Decline Curves Analysis
 3.1 - Solution for a Well in a Closed Circular Reservoir: Constant Pressure Production
 3.2 - Fetkovich Decline Curve Plotting; 3.2.1 - Fetkovich Dimensionless Variables; 3.2.2 - Fetkovich Dimensionless Decline Rate and Decline Cumulative Production Type Curves; 3.2.3 - Fetkovich-Arps Dimensionless Decline Rate and Decline Cumulative Production Type Curves; 3.2.4 - Fetkovich-Arps Dimensionless Decline Rate Integral Type Curves; 3.2.5 - Fetkovich-Arps Dimensionless Decline Rate Integral Derivative Type Curves; 3.3 - Decline Curve Analysis Using Fetkovich-Style Type Curves
 3.3.1 - Conventional Decline Curve Analysis

Sommario/riassunto

In recent years, production decline-curve analysis has become the most widely used tool in the industry for oil and gas reservoir production analysis. However, most curve analysis is done by computer today, promoting a "black-box" approach to engineering and leaving engineers with little background in the fundamentals of decline analysis. Advanced Production Decline Analysis and Application starts from the basic concept of advanced production decline analysis, and thoroughly discusses several decline methods, such as Arps, Fetkovich, Blasingame, Agarwal-Gardner, NPI, transient, long linear
