Sommario/riassunto	"The premiership of Margaret Thatcher has been portrayed as uniquely ideological in its pursuit of a more market-based economy. A body of literature has been built on how a sharp turn to the right by the Conservative Party during the 1980s - inspired by the likes of Milton Friedman and Friedrich Hayek - acted as one of the key stepping- stones to the turbo-charged capitalism and globalization of our modern world. But how 'neoliberal' was Thatcherism? The link between ideas and the Thatcher government has frequently been over- generalised and under-specified. Existing accounts tend to characterise neoliberalism as a homogeneous, and often ill-defined, group of thinkers that exerted a broad influence over the Thatcher government. In particular, this study explores how Margaret Thatcher approached

special interest groups, a core neoliberal concern. The results demonstrate a willingness to utilise the state, often in contradictory ways, to pursue apparently more market-orientated policies. This book - through a combination of archival research, interviews and examination of neoliberal thought itself - defines the dominant strains of neoliberalism more clearly and explores their relationship with Thatcherism.
