Nota di contenuto	A conceptual framework for axis VI -- Proposing the diversity/resiliency axis VI -- Mood disorders and axis VI -- Anxiety disorders and axis VI -- Conduct disorder, oppositional defiant disorder, and axis VI -- Dementia : Alzheimer's disease and axis VI -- Schizophrenia, other psychotic disorders, and axis VI -- Substance related and co-occurring disorders and axis VI -- Future directions.
Sommario/riassunto	As it stands, the DSM fails to address important sources of strength and resiliency that can significantly affect diagnosis and treatment. The authors of this transformative volume propose enhancements to the current diagnostic and classification system that encompass the biopsychosocial, cultural, and spiritual milieus of individuals and acknowledge the strengths originating from personal, family, and community resources. This proposed Axis VI addresses contextual and individual factors related to diversity, equity, and resiliency, thereby enabling an understanding of the whole person and off
