Vernick, Daniel W. Webster, and Katherine A. Vittes -- Tort litigation for the public's health / Elizabeth Weeks Leonard -- Punitive damages and

the public health agenda / Jean Macchiaroli Eggen.

Sommario/riassunto

This book approaches a variety of social and political issues that have become highly polarized and resistant to compromise by examining them through a population-based public health perspective. The topics included are some of the most contentious: abortion and reproductive rights; end-of-life issues, including the right to die and the treatment of pain; the connection between racism and poor health outcomes for African-Americans; the right of same-sex couples to marry; the toll of gun violence and how to reduce it; domestic violence and how the criminal justice model fails to deal with it effectively; and how tort compensation and punitive damages can further public health goals. People at every point along the political spectrum will find the book enlightening and informative. Written by eight authors, all of whom have cross-disciplinary expertise, this book shifts the focus away from the point of view of rights, politics, or morality and examines the effect of laws and policies from the perspective of public health and welfare.

Sommario/riassunto

Fritz Marti (1894-1991) came from Switzerland, where he had completed his doctorate in philosophy, to The University of Oregon, Eugene, in 1923. He was a serious, committed scholar in the tradition of German Idealism. The book is about his search for intellectual freedom in America. He was part of the evolution of higher education in the United States in the 20th Century and taught at colleges and universities across the country such as Oregon, Goucher, Maryland, Chicago and Notre Dame. He became passionate about the role of a college education. In 1947 he and his wife Gertrude Austin establis
