

1. Record Nr.	UNINA9910824194603321
Autore	Rogers Paul
Titolo	z/OS diagnostic data [[electronic resource] ] : collection and analysis // Paul Rogers, David Carey
Pubbl/distr/stampa	San Jose, CA, : IBM, International Support Organization, c2005
Edizione	[1st edition]
Descrizione fisica	1 online resource (270 pages)
Collana	IBM redbooks
Altri autori (Persone)	CareyDavid
Soggetti	Computer networks - Security measures Operating systems (Computers)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"August 2005." "SG24-7110-00." Includes index.
Nota di bibliografia	Includes bibliographic references and index.
Sommario/riassunto	This IBM Redbook describes problem diagnosis fundamentals and analysis methodologies for the z/OS system. It provides guidelines for the collection of relevant diagnostic data, tips for analyzing the data, and techniques to assist in identifying and resolving of Language Environment, CICS, CICSplex/SM, MQSeries, VTAM, and DB2 problems. Also described are some diagnostic procedures that are not purely z/OS, but that are related to the various platforms (UNIX and Windows) where IBM software executes and interacts with z/OS in a Client/Server or distributed framework topology. This document shows you how to: - Adopt a systematic and thorough approach to dealing with problems - Identify the different types of problems - Determine where to look for diagnostic information and how to obtain it - Interpret and analyze the diagnostic data collected - Escalate problems to the IBM Support Center when necessary Diagnostic data collection and analysis is a dynamic and complex process. This redbook shows you how to identify and document problems, collect and analyze pertinent diagnostic data and obtain help as needed, to speed you on your way to problem resolution.
