

1. Record Nr.	UNINA9910824212103321
Autore	Boumaraf Latra
Titolo	Ejectors and their usefulness in the energy savings [[electronic resource] /] / Latra Boumaraf, Andre Lallemand and Philippe Haberschill
Pubbl/distr/stampa	New York, : Nova Science, c2010
ISBN	1-61122-483-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (116 p.)
Collana	Energy Science, Engineering and Technology
Altri autori (Persone)	LallemandAndre HaberschillPhilippe
Disciplina	621.5/6
Soggetti	Refrigeration and refrigerating machinery - Equipment and supplies Ejector pumps Refrigeration and refrigerating machinery - Energy consumption Refrigeration and refrigerating machinery - Energy conservation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [83]-88) and index.
Nota di contenuto	Performance analysis of an ejector refrigeration system -- Behavior modeling of an ejector refrigeration system in "design" and "off-design" conditions -- Performance improvment of an ejector refrigeration system and coupling -- Energetic efficiency improvment of the transcritical CO2 refrigeration system by using an ejector as an expansion device.
