

1. Record Nr.	UNINA9910824287603321
Autore	Subbu Raj
Titolo	Network-based distributed planning using coevolutionary algorithms / / Raj Subbu, Arthur C Sanderson
Pubbl/distr/stampa	River Edge, NJ, : World Scientific, 2004
ISBN	1-281-93474-7 9786611934743 981-279-485-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (193 p.)
Collana	Series in intelligent control and intelligent automation ; v. 13
Altri autori (Persone)	SandersonA. C (Arthur C.)
Disciplina	004 005.2/76 005.276
Soggetti	Electronic data processing - Distributed processing Algorithms Intelligent agents (Computer software)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 159-168) and index.
Nota di contenuto	Contents ; Foreword ; Preface ; 1. Introduction ; 1.1 Motivation ; 1.2 Approach ; 1.3 Principal Contributions ; 1.4 Book Outline ; 2. Background and Related Work ; 2.1 Collaborative Manufacturing ; 2.1.1 Concurrent Engineering ; 2.1.2 Agile Manufacturing 2.2 Combinatorial Optimization 2.2.1 Deterministic Algorithms ; 2.2.2 Stochastic Algorithms ; 2.3 Evolutionary Algorithms ; 2.3.1 Principal Techniques ; 2.3.2 Theory and Applications ; 2.3.3 Techniques for Constrained Optimization ; 2.3.4 Multi-Node Algorithms 2.3.5 Techniques for Dynamic Environments 2.4 Agents ; 2.5 Distributed Problem Solving ; 3. Problem Formulation and Analysis ; 3.1 Introduction ; 3.2 General Problem Formulation

;	3.2.1 Constraints	;	3.2.2 Objectives	;
	3.2.3 Optimization Problem	;	3.2.4 Complexity	
	Analysis			
	3.3 Printed Circuit Assembly Problem			3.3.1
	Complexity Analysis	;	3.4 Algorithm Applicability	
	Analysis	;	3.4.1 Rationale	;
	3.4.2 Problem Structure	;	3.4.3 Evaluation of	
	Alternative Algorithms	;	3.4.4	
	Discussion	;	4. Theory and Analysis of Evolutionary	
	Optimization	;	4.1 Introduction	
	4.2 Theoretical Foundation		4.2.1 Notation	
	;	4.2.2 General Algorithm	;	4.2.3 Basic Results
	;	4.3 Convergence Analysis	;	4.3.1 Convergence for
	a Unimodal Objective		;	4.3.2
	Convergence for a Bimodal Objective			;
	5. Theory and Analysis of Distributed Coevolutionary Optimization			
	5.1 Introduction			

Sommario/riassunto

In this book, efficient and scalable coevolutionary algorithms for distributed, network-based decision-making, which utilize objective functions are developed in a networked environment where internode communications are a primary factor in system performance. A theoretical foundation for this class of coevolutionary algorithms is introduced using techniques from stochastic process theory and mathematical analysis. A case study in distributed, network-based decision-making presents an implementation and detailed evaluation of the coevolutionary decision-making framework that incorporates di
