1. Record Nr. UNINA9910824362203321

Titolo	WebSphere Everyplace Access version 4.3 handbook for developers / / [Juan R. Rodriguez ... et al.]
Pubbl/distr/stampa	[S.l.], : IBM, International Technical Support Organization, c2003
Edizione	[2nd ed.]
Descrizione fisica	xx, 1298 p. : ill
Collana	IBM redbooks
Altri autori (Persone)	RodriguezJuan R
Disciplina	005.3
Soggetti	Application software
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"November 2003."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front cover -- Contents -- Notices -- Trademarks -- Preface -- The team that wrote this redbook -- Become a published author -- Comments welcome -- Chapter 1. Overview -- 1.1 The Big Picture -- 1.2 Inside the product -- 1.2.1 WebSphere Everyplace Access -- 1.2.2 Portlets -- 1.2.3 WebSphere Everyplace Access services -- 1.2.4 Everyplace Client -- 1.2.5 Everyplace Toolkit Version V4.3 -- 1.2.6 Component products -- 1.2.7 Complementary products -- Chapter 2. Administration -- 2.1 Getting started -- 2.2 Managing users and groups -- 2.3 Install portlets -- 2.4 Manage places and pages -- 2.5 Managing access control -- 2.6 Changing themes and skins -- Chapter 3. Enhanced portlets -- 3.1 Introduction -- 3.1.1 Supported devices -- 3.2 Enhanced portlets provided by Everyplace Access -- 3.2.1 Lotus Notes PIM portlets -- 3.2.2 Microsoft Exchange PIM portlets -- 3.2.3 Productivity portlets -- Chapter 4. Everyplace Client -- 4.1 Overview -- 4.2 Everyplace Client for Palm OS -- 4.2.1 Everyplace Client installation -- 4.2.2 Everyplace Client configuration for Palm OS 5.2 -- 4.3 Everyplace Client for Pocket PC 2002 -- 4.3.1 Everyplace Client installation -- 4.3.2 Everyplace Client configuration -- 4.4 Everyplace Client for Zaurus -- 4.4.1 Desktop Pass-through Proxy installation -- 4.4.2 Desktop Pass-through Proxy configuration -- 4.4.3 Everyplace Client installation -- 4.4.4 Everyplace Client configuration -- Chapter 5. Everyplace Client secure connections -- 5.1 Introduction -- 5.2 Enabling SSL on IBM HTTP Server -- 5.2.1 Creating a key database -- 5.2.2 Create a self-signed key file -- 5.2.3 Setting up IBM HTTP Server

-- 5.2.4 Verifying if security is enabled on IBM HTTP Server -- 5.3 Enabling SSL in WebSphere Application Server -- 5.3.1 Configuring WebSphere Application Server -- 5.3.2 Verifying if security is enabled on WebSphere Application Server.
5.4 Enabling SSL in Everyplace Client -- 5.4.1 Enabling SSL in Pocket PC devices -- 5.4.2 Enabling SSL in Palm devices -- Chapter 6. Mobile application development using portlets -- 6.1 Portlets -- 6.1.1 Portlet terminology -- 6.2 How portlets work -- 6.2.1 The Model-View-Controller (MVC) architecture -- 6.2.2 The portlet life cycle -- 6.3 Portlets and WebSphere Everyplace Access -- 6.4 Making a portlet project -- 6.4.1 Defining a portlet project -- 6.4.2 Types of portlet projects -- 6.4.3 Parameters of a portlet project -- 6.4.4 Contents of a portlet project -- 6.5 Testing and debugging portlets -- 6.5.1 Setting up a test environment and running a portlet -- 6.5.2 Testing portlet projects on Pocket PC, Palm, and WAP devices -- 6.5.3 Debugging with the test environment -- Chapter 7. WebSphere Studio Site Developer and Everyplace Toolkit -- 7.1 WebSphere Studio Site Developer V5.0 -- 7.1.1 WebSphere Studio Site Developer -- 7.1.2 Site Developer and Application Developer -- 7.1.3 Everyplace Toolkit -- 7.1.4 Everyplace Toolkit and the Portal Toolkit -- 7.1.5 Multiple Device Authoring Technology -- 7.1.6 Other tools of interest -- 7.2 The WebSphere Studio Site Developer workbench -- 7.2.1 Starting Site Developer -- 7.2.2 The workbench user interface -- 7.2.3 How to get help -- Chapter 8. My first portlet applications -- 8.1 Create a MVC portlet application supporting HTML -- 8.1.1 Instructions -- 8.1.2 Examining the HelloWorldMVC project -- 8.1.3 Changing a portlet application -- 8.2 Create a JSP portlet that supports WML -- 8.2.1 Modifying the HelloWorldJSP portlet -- Chapter 9. Portlet action event handling -- 9.1 Overview -- 9.2 Create the ActionEvent portlet -- 9.3 Update the portlet code -- 9.4 Look inside the ActionEventLab project -- 9.5 WML and the ActionEvent portlet -- 9.5.1 Examine the code that renders the content.
Chapter 10. Portlet messaging -- 10.1 Overview -- 10.2 Using a portlet to send a message -- 10.3 Creating the target portlet -- 10.4 Receiving a message -- 10.5 Displaying the message in View mode -- 10.6 Running the portlet application -- Chapter 11. Portlet National Language Support (NLS) -- 11.1 Overview -- 11.2 Creating the NLS bundles -- 11.3 Accessing NLS bundles from JSPs -- 11.4 Running the portlet -- Chapter 12. Portlet Credential Vault -- 12.1 Overview -- 12.2 Creating the portlet project -- 12.3 Updating the active Credential Vault project -- 12.4 Reviewing the portlet code -- 12.5 Running the portlet project -- Chapter 13. Offline Portal Content -- 13.1 Overview -- 13.2 How it works -- 13.3 Limitations -- 13.4 Configuration -- 13.4.1 Server configuration -- 13.4.2 Administrator configuration -- 13.4.3 User configuration -- 13.5 Usage -- 13.5.1 Pocket PC devices -- 13.5.2 Palm OS V5.2 devices -- 13.6 Development guidelines -- 13.6.1 Enable support for PDA markup -- 13.6.2 Adhere to XML "well-formedness" -- 13.6.3 Do not use Form GET method -- 13.6.4 Do not use PortletActions -- 13.6.5 Plan for dynamic content -- 13.6.6 Avoid action buttons -- 13.6.7 Avoid cascading forms -- 13.7 Scenarios -- 13.7.1 Scenario 1: Offline browsing -- 13.7.2 Scenario 2: Offline forms -- 13.7.3 Scenario 3: Converting an online portlet for offline usage -- 13.8 Hints and tips -- 13.8.1 Deleting users -- 13.8.2 Changing PDA icon -- 13.9 Resources -- Chapter 14. Transcoding Technology -- 14.1 Overview -- 14.1.1 Architecture -- 14.1.2 Preference profiles -- 14.1.3 XML stylesheets -- 14.1.4 Annotators -- 14.1.5 Transcoding plug-ins -- 14.2 XML configuration utility -- 14.3 Request Viewer -- 14.3.1 How to start Request Viewer -- 14.4 Logging and tracing --

14.4.1 Message files -- 14.4.2 Trace files -- 14.4.3 Gather troubleshooting data.
14.5 A simple portlet using Transcoding Technology -- 14.5.1 Enable transcoding -- 14.5.2 Use Request Viewer to monitor the process -- Chapter 15. Using annotation to clip HTML documents -- 15.1 Annotation overview -- 15.1.1 Annotation processing -- 15.2 Internal annotation -- 15.2.1 Page Designer in WebSphere Studio -- 15.2.2 Sample application: MyRedbookNews -- 15.3 External annotation -- 15.3.1 The external annotation language -- 15.3.2 Sample scenario: YourRedbookNews -- 15.3.3 Using the HTML Annotation Editor -- 15.3.4 Running our portlet with external annotations -- 15.3.5 Viewing the results of external annotation -- Chapter 16. Using XSL transformations and XML tools -- 16.1 Overview -- 16.1.1 Configuring stylesheets -- 16.2 Configure Portal for stylesheet processing -- 16.3 Sample scenario 1: RSSNewsFeed -- 16.3.1 Configuring the RSSNewsFeed portlet -- 16.4 Sample scenario 2: ITSONewsBrief -- 16.4.1 Sample stylesheets -- 16.5 XML tools -- 16.5.1 DTD editor -- 16.5.2 XML editor -- 16.5.3 XSL editor -- 16.5.4 XML to XML mapping editor -- 16.5.5 Summary -- Chapter 17. Portal-level transcoding -- 17.1 Overview -- 17.1.1 How it works -- 17.1.2 Fragmentable elements -- 17.1.3 Common problems -- 17.1.4 Example -- 17.2 WML fragmentation -- 17.2.1 Scenario 1: Using a WAP reverse proxy -- 17.2.2 Scenario 2: Using a forward proxy -- 17.2.3 Scenario 3: Using a forward proxy and reverse proxy -- Chapter 18. DB2 Everyplace applications with WebSphere Studio Device Developer -- 18.1 Overview -- 18.1.1 Introduction -- 18.1.2 Java 2 Micro Edition -- 18.1.3 WebSphere Micro Environment -- 18.2 Installing WebSphere Studio Device Developer -- 18.3 Working with WebSphere Studio Device Developer -- 18.3.1 Using the workbench -- 18.3.2 Using the Update Manager -- 18.4 Sample scenario -- 18.4.1 Define the database tables for the application.
18.4.2 Configure the Pocket PC device for development -- 18.4.3 Create the project on WebSphere Studio Device Developer -- 18.4.4 Set up the build and test environment -- 18.4.5 Write the Java classes of the application -- 18.4.6 Test the application on the device -- Chapter 19. DB2 Everyplace applications with Mobile Application Builder (MAB) -- 19.1 Overview -- 19.2 Installation -- 19.3 Required components for Palm development -- 19.4 Windows CE development environment -- 19.5 DB2 Everyplace runtime environment -- 19.6 Scenario: A sales force automation application -- 19.6.1 Table definitions for the application -- 19.6.2 Planning the flow of the application -- 19.6.3 Create a project in the Mobile Application Builder -- 19.6.4 Configure the preferences -- 19.6.5 Load the table definitions -- 19.6.6 Start creating the forms -- Chapter 20. Synchronizing with DB2 databases -- 20.1 Architecture overview -- 20.1.1 DB2 Everyplace -- 20.1.2 IBM Everyplace Client -- 20.1.3 DB2 Everyplace Sync Server -- 20.2 Before you start -- 20.3 Server configuration -- 20.3.1 Creating users and groups -- 20.3.2 Creating subscription and subscription set -- 20.4 Binding LDAP and MDAC -- 20.5 DB2 Everyplace Client configuration -- 20.6 Sample application synchronization -- 20.7 Verify the synchronization -- 20.8 Synchronization using SSL -- 20.8.1 Enable server security -- 20.8.2 Enable client security -- 20.9 Synchronization with remote DB2 databases -- 20.10 Types of subscription -- 20.10.1 DataPropagator subscription -- 20.10.2 Upload subscription -- 20.11 Filtering data from data sources -- 20.12 Debug and tracing -- 20.12.1 Enable tracing -- 20.12.2 Trace files -- 20.12.3 DB2 Everyplace control database -- 20.13 Hints and tips -- Chapter 21. Synchronizing with Oracle databases -- 21.1 Common grounds with

DB2 data source.

21.2 Create a subscription with Oracle data source.
