

1. Record Nr.	UNINA9910824381203321
Autore	Ackerman Frank
Titolo	Climate economics : the state of the art // Frank Ackerman and Elizabeth A. Stanton
Pubbl/distr/stampa	London : , : Routledge, Taylor & Francis Group, , 2013
ISBN	1-135-07404-6 0-203-06631-6 1-299-14103-X 1-135-07405-4
Descrizione fisica	1 online resource (viii, 187 pages)
Collana	Routledge studies in ecological economics ; ; 27
Disciplina	363.738/74
Soggetti	Climatic changes - Economic aspects Greenhouse gas mitigation - Economic aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Climate science for economists -- Damage functions and climate impacts -- Climate change impacts on natural systems -- Climate change impacts on human systems -- Climate economics before and after the stern review -- Uncertainty -- Public goods and public policy -- Economics and the climate policy debate -- Technologies for mitigation -- Economics of mitigation -- Adaptation -- Conclusion.
Sommario/riassunto	Climate science paints a bleak picture: The continued growth of greenhouse gas emissions is increasingly likely to cause irreversible and catastrophic effects. Urgent action is needed to prepare for the initial rounds of climatic change, which are already unstoppable. While the opportunity to avert all climate damage has now passed, well-designed mitigation and adaptation policies, if adopted quickly, could still greatly reduce the likelihood of the most tragic and far-reaching impacts of climate change. Climate economics is the bridge between science and policy, translating scientific
