

1. Record Nr.	UNINA9910824399603321
Titolo	Engineering, construction, and architectural management . Volume 14, Number 6 Sustainable development through culture and innovation
Pubbl/distr/stampa	[Bradford, England], : Emerald, 2007
ISBN	1-281-14350-2 9786611143503 1-84663-671-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (126 p.)
Collana	Engineering, Construction and Architectural Management - Volume 14, Issue 6
Disciplina	658/.92/4
Soggetti	Architectural practice - Management Construction industry - Management Project management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This ECAM e-book publishes seven selected papers from The Joint Conference on Construction, Culture, Innovation and Management held in Dubai from 26 to 29 November. The overwhelming theme of this issue is culture and the cultural issues affecting construction management which is reinforced by the international group of authors contributing to the issue. The recurrent theme throughout is trust as it is apparent that this is the current unsolved research area in construction management.
